The EEG and Behavior: Motor and Mental Activities  p. 41
Motor Performance and the EEG  p. 41
Reaction Time and EEG  p. 41
Visuomotor Performance  p. 43
EEG Patterning  p. 44
EEG and Mental Activity  p. 46
EEG and Intelligence (The Search for a Culture-Free Test)  p. 46
EEG Period  p. 47
EEG Spectral Analysis  p. 47
EEG Coherence  p. 47
EEG Complexity  p. 48
EEG Alpha Power  p. 48
EEG in Memory and Recall  p. 49
Gamma Wave Activity  p. 49
Event-Related Desynchronization  p. 49
Hemispheric Asymmetries in the EEG  p. 50
Behavioral Studies Showing Asymmetries  p. 50
EEG Studies Showing Asymmetries  p. 51
EEG Asymmetries in Emotional Expression of Infants  p. 53
EEG Asymmetries in Emotional Expression of Adults  p. 54
EEG, Hypnosis, Imagery, and Meditation  p. 55
The EEG and Behavior: Sensation, Attention, Perception, Conditioning and Sleep  p. 61
Sensation, Attention, Perception, and the EEG  p. 61
Sensation and the EEG  p. 63
Stimulus Complexity  p. 63
Stimulus Thresholds  p. 63
Odor Stimulation and EEG Pattern  p. 63
Attention and the EEG  p. 64
Attention  p. 65
Vigilance and Signal Detection  p. 65
Perception and the EEG  p. 67
Perceptual Structuring  p. 67
Ambiguous Figures  p. 67
Conditioning of the EEG  p. 68
Classical Conditioning of the EEG  p. 68
Operant Conditioning of the EEG  p. 69
Expectancies and Noncontingent Stimuli  p. 69
Sleep and the EEG  p. 70
The Nature of Sleep EEG  p. 70
EEG and Dreaming  p. 73
Depth of Sleep and Capacity to Respond  p. 73
Skin Conductance p. 196
Skin Potential p. 196
Origin of EDA p. 197
The Measurement of EDA p. 197
Skin Conductance Level (SCL) p. 197
Skin Potential p. 197
Electrodes for Recording EDA p. 199
Analysis of EDA Data p. 199
Electrodermal Phenomena and Behavior p. 200
Reaction Time p. 200
Level of Arousal p. 200
Fixed and Variable Signal Schedules p. 200
High NS-SCRs (Labiles) and Low NS-SCRs (Stabiles) p. 201
Mental Activity and Electrodermal Phenomena p. 201
Learning and Memory p. 202
Arousal p. 202
Habituation p. 202
Positive and Negative Affect and EDA p. 203
Music and Imagery p. 203
Observed Violence p. 203
Erotic Stimuli p. 203
Emotional Expression p. 203
Mother-Infant Interaction p. 204
Motivation and SCR Recovery Time p. 204
Signal Detection and EDA p. 205
Vigilance p. 205
Recognition of Faces p. 206
Unconscious Recognition? p. 206
The Orienting Response and EDA p. 207
Neuronal Model p. 207
Stimulus Distance and Change p. 207
Habituation p. 208
Role of Stimulus Significance p. 208
Information-Processing Model p. 209
Stimulus Omissions p. 209
Alcohol Effects p. 210
Conditioning of EDA p. 210
Classical Conditioning of EDA p. 211
Affective Value of the CS p. 211
Phobias p. 211
Unconditioned Response Probability (URP) and CS-UCS Interval p. 212
Schizophrenia
Manic Depression
Eye Movements and Perception
Scan Paths
Pictoral Information
Eye Movements and Illusions
Muller-Lyer Illusion
Rebound Illusion
The Eye Blink (EB) in Cognition, Information Processing, and Stress
Cognitive Activity and Eye Blinks
Information Processing
Stress
The Eyeblink Component of the Startle Response in Attention, Emotion, and Clinical Research
Eyeblink and the Startle Response
Inhibition of the EB Startle Response
Attentional Processing with Short and Long Lead Intervals
Allocation of Attentional Resources
The EB Component of the Startle Response in Emotion
Emotional Valence and Physiological Arousal
Positive and Negative Sensory Experience
The EB Component of Startle in Clinical Research
Heart Activity and Behavior I: Developmental Factors, Motor and Mental Activities, Perception, Attention, and Orienting Responses
Anatomy and Physiology of the Heart
Heart Structures Involved in Blood Circulation
Control of the Heartbeat (Cardiac Cycle)
Internal Cardiac Control
External Cardiac Control
Carotid Sinus Reflex
Measurement of Heart Activity (Electrocardiogram or ECG)
Wave Component Durations
Limb Leads for Recording the ECG
Amplitude and Recording Characteristics of the ECG
Measures in Research
Impedance Cardiography
Electrodes in ECG Recordings
Heart Activity and Behavior
Developmental Factors
Attention and Heart Rate (HR)
Emotional Reactions in Children
Performance and Heart Activity
Reaction Time p. 269
Complex Motor Performance and Heart Activity p. 270
Heart Activity and Mental Performance p. 271
Verbal Learning p. 271
Problem Solving p. 272
Imagery and Meditation p. 272
Heart Activity and Perception p. 274
Perceptual Thresholds p. 274
Heart Activity, Attention, and the Orienting Response p. 275
Heart Activity and Behavior II: Stress, Emotions, Motivation, Personality, Social Factors, Brain Interactions, and Conditioning p. 281
Heart Rate and Affective Processes p. 281
Stress p. 281
Emotional Response p. 283
Patterns of Emotional Response p. 283
Detection of Physiological Changes in Emotion p. 283
Influence of Physiological Response on Felt Emotion p. 284
Frustration and Fear p. 284
Motivation p. 285
Incentive and Competition Effects p. 286
Cardiovascular Reactivity (CVR), Personality, and Social Factors p. 286
Cardiovascular Reactivity p. 286
Personality p. 287
Parental History of Hypertension as a Factor p. 287
Hostility and Cardiovascular Reactivity p. 288
Social Factors p. 289
Social Support and Coping p. 289
Social Context p. 290
Cognitive Dissonance p. 290
Interactions Between Heart and Brain Activity p. 291
Sensitivity to Signals p. 292
Hemispheric Differences in Brain-Heart Interactions p. 292
The CNV and Heart Activity p. 292
Conditioning of Heart Activity p. 294
Classical Conditioning p. 294
Instrumental Conditioning p. 295
Blood Pressure, Blood Volume, and Behavior p. 301
Anatomy and Physiology of the Blood Vessels p. 301
Innervation of Blood Vessels p. 302
Regulation of Blood Pressure p. 303
Regulation of Blood Volume p. 304
Measurement of Blood Pressure p. 304
