Visualization and Analysis of Flight Crew Procedure Performance

Influence of Interfaces on Human Performance in S&c; of Large Technical Systems

An Operator Support System Based on Situation Similarity

Three-Dimensional Representation of Process Values

Identifying Core Sequences in Process Control Across Branches

Estimation of Plant Operator’s Cognitive Modes Based on the Cognition Model
Human-Computer-Interactions in Call-Centers - Ergonomic Demands and Design Solutions

Call Centre: Technical and Organisational Challenges

Mental Load of Call Center Agents

New Design Solution for Call Centre Work Places from the Point of View of Furniture Manufacturer

Call Center - Interface Between Companies' Practice and the Competence Network of Safety and Health at Work in North-Rhine-Westfalia

Communication Beyond Reality

Preface
Acknowledgements
Information Networks and Communication
Focus Groups: A Qualitative Method to Elicit Culture-Specific User Requirements
A Direct Manipulation User Interface for the Control of Communication Processes - Making Call Handling Manageable -
User Interface Design -- the Driving Force for the Integration of Information and Communication
Transparent Communication Appliances
Mental Effort Increases When Adding A Voice Control Feature to A Familiar Interface

Contextual Research for Technological Innovation - Satisfying User Needs in the Design of Mobile Communication Devices
Defining User Requirements for Wap Services
Usability Evaluation of A High-Fidelity Smart Phone Prototype: Task Navigation Depth Affects Effectiveness
Sound in the Interface to A Mobile Computer
Strategy Differences in Data Flow Diagram Comprehension Between Intermediates and Novices
Using the Memory Load Measurement to Improve Software Development
Likes and Dislikes of Electronic Mail Addresses: A Users' Survey
Information Representation and Decision Process: Effects of Measurement Scale and Shape of Decision Matrix on Preferential Choice
Cultural and Cultivation Features on Web Designing: A Case Study of Gold Peach Community
Learning Path Planning Using Genetic Algorithm Approach
What Are You Looking at on the Web: Information or Applications?
“Search Manager”: A Dynamic and Incremental Tool for Searching Complex Objects in Multihierarchical Structures
Using User Behavior Similarity for Recommendation Computation: the Broadway Approach
Developing Hcl Design Principles for Information Retrieval Applications
The Link Between Data and Tasks - the Crucial Challenge in Designing User Interfaces
Information Retrieval Systems
Visualization in Document Retrieval
Designing Usable Keyword Search Systems
Expertise in A Complex Domain: Supporting Creativity Through Knowledge
Visualisation and Re-Description
Visualization of Scientific Information in A Virtual Information Space
Maximizing Data Density: A Case Study of Visualization in Network Monitoring
Visualizing Collaborative Filtering Results
Dynamic Spatial Layout in Graphical User Interfaces
Emotion Recognition and Its Application to Computer Agents with Spontaneous Interactive Capabilities
Personal Service Assistants with Personality
An Empirical Study on the Trustworthiness of Life-Like Interface Agents
Agents in the Box
How to Get the Right Outfit for My Agent? Classification- and Design Methodology for A Virtual Shopping Assistant in A 3d World
Recognition of Japanese Sign Language Words Using Finite Automata
Towards the Realization of Non-Verbal Communication - Computer Vision Based Technologies for Analyzing Human Images -
Multiple Points Face-To-Face Communication in Cyberspace Using Multi-Modal Agent
Virtual Face-To-Face Communication System for Human Interaction Analysis by Synthesis
Performance Support for the Next Millennium: A Model for Rapidly Changing Technologies in A Global Economy
The Super Operator Concept - Wearable Information System for Manufacturing System Personnel
Supporting A Learning Operative Organization
Determinants of A Successful Hypermedia Application to Support Team-Based Maintenance
The Starwalker Virtual Environment -- an Integrative Design for Social Navigation
Influence of Interaction Modes on A Collaborative Task and Structure of Dialogues in Video Communication
Video in Digital Stories: A New Approach for Team Integration and Knowledge Management in Business Context
The Drawstream Station: A Tool for Distributed and Asynchronous Chats About Sketches and Artifacts
Visualisation in Collaborative Computer Mediated Dialogue
Wearing A Telephone
Tailor to Fit
A Sensor Network System for Human Support in Living Environments
Electronicmanual: Helping Users with Ubiquitous Access
Sensor-Based Adaptive Mobile User Interfaces
Concurrent Engineering Activities Using Videophone Communications
Ergonomic Approach to Customised Development of Videotelephony Applications
Field Experiences of Providing Home Care and Related Services Over A Videophone
Implementation Criteria for A Videophone System Used in Telemedicine - A Case in Finnish Health Care
Multimedia Applications for Supporting Industrial Maintenance
Spaces for Creating Context & Awareness - Designing A Collaborative Virtual Work Space for (landscape) Architects

Augmenting Self-Controlled Work Allocation in Workflow-Management-Applications

Supporting Perspective Making and Perspective Taking: A Framework for Contextual Information

Computer Supported Communication and Cooperation - Making Information Aware

Enterprise Expert and Knowledge Discovery

Concepts for Distributed Groupware Operating Systems

Norms and Conventions in Collaborative Systems

Improving Public Administration by Video Conferencing and Application Sharing - Mission Possible

Towards an Awareness Infrastructure for Cooperative Applications

Atmosphere: Towards Context-Selective Awareness Mechanisms
