## Preface

Robust Stability: The Polynomial Case

- **Kharitonov’s Theorem and the Second Method of Lyapunov**  
  p. 3

- **Stability Margins of Perturbed Systems**  
  p. 13

- **Frequency Domain Criteria for Robust Root Locations of Generalized Disc Polynomials**  
  p. 23

Robust Stability: The Matrix Case

- **A Branch and Bound Method to Check the Stability of a Polytope of Matrices**  
  p. 125

- **Bounds on the Real Stability Radius**  
  p. 139

- **Necessary and Sufficient Conditions for Robust Stability with Structured Time-Invariant Perturbations**  
  p. 147

- **A Nonconservative Kronecker Based Theory for Robust Root Clustering of Linear State Space Models with Real Norm Bounded Uncertainty**  
  p. 155

- **A Necessary and Sufficient Condition for Quadratic Finite Time Feedback Controllability**  
  p. 165

- **Lyapunov Based Robustness**  
  p. 177

Robust Stability: Multilinear Parameter Dependence

- **Robustness Properties of Multilinear Interval Systems**  
  p. 73

- **Easily Testable Sufficient Conditions for the Robust Stability of Systems with Multi-affine Parameter Dependence**  
  p. 81

- **Robustness Analysis for Multilinear Perturbations**  
  p. 93

- **On the Multi-affine Image of a Cube**  
  p. 105

- **Robust Stability: The Nonlinear Case**  
  p. 113

- **Robust Absolute Stability of Continuous Systems**  
  p. 113

- **Robust Stability: The Matrix Case**  
  p. 125

- **A Branch and Bound Method to Check the Stability of a Polytope of Matrices**  
  p. 125

- **Bounds on the Real Stability Radius**  
  p. 139

- **Necessary and Sufficient Conditions for Robust Stability with Structured Time-Invariant Perturbations**  
  p. 147

- **A Nonconservative Kronecker Based Theory for Robust Root Clustering of Linear State Space Models with Real Norm Bounded Uncertainty**  
  p. 155

- **A Necessary and Sufficient Condition for Quadratic Finite Time Feedback Controllability**  
  p. 165

- **Lyapunov Based Robustness**  
  p. 177

- **Robustness Analysis of Linear Control Systems with Uncertain Parameters by the Method of Convex Decomposition**  
  p. 189

Performance

- **H(\textit{actual symbol not reproducible})-Performance of Interval Plants and Interval Feedback Systems**  
  p. 201

- **Linear vs. Nonlinear Approaches to Robustness Analysis of LTI Control Systems**  
  p. 211

Control Design

- **Analysis and Design of Robustly Stable Systems via Zero-Set Methods**  
  p. 219

- **A Robust Control Design in the Parameter Space**  
  p. 229

- **Optimizing the Guaranteed Cost in the Control of Uncertain Linear Systems**  
  p. 241

- **Robust PID Control and Lead-Lag Compensation for Linear Interval Systems**  
  p. 251

- **Model Following Robust Control of Linear Time-Varying Uncertain Systems**  
  p. 261

- **A Convex Parameterization of Robustly Stabilizing Controllers**  
  p. 271
Robust Compensator Synthesis - An Experimental Application  p. 281
Velocity-Independent Yaw Eigenvalues of Four-Wheel Steering Automobiles  p. 291
Some Open Problems  p. 305
