Table of Contents

Foreword
Preface
Contributors

**Evolution, Chronobiology, and Functions of Polyphasic and Ultrashort Sleep: Main Issues**
- p. 1

**Evolution, Development, and Regulation of the Sleep-Wake Cycle**
- p. 23

**Thermoregulation and Control of the Ultradian Wake-Sleep Cycle**
- p. 31

**The Phasing of Sleep in Animals**
- p. 50

**Sleep-Wake Rhythms and Sleep Structure in the First Year of Life**
- p. 58

**Developmental Aspects and a Behavioral Model of Human Sleep**
- p. 71

**Circadian and Ultradian Components of the Sleep-Wake System**
- p. 82

**The Timing and Structure of Spontaneous Naps**
- p. 102

**The Impact of Irregular Sleep-Wake Schedules on Circadian Rhythms and the Role of “Anchor” Sleep**
- p. 118

**Beyond Circadian Regulation: Ultradian Components of Sleep-Wake Cycles**
- p. 137

**Adult Napping and Its Effects on Ability to Function**
- p. 180

**Polyphasic and Ultrashort Sleep and Their Effects on Performance**
- p. 185

**The Effects of Polyphasic and Ultrashort Sleep Schedules**
- p. 199

**Leonardo da Vinci and Ultrashort Sleep: Personal Experience of an Eclectic Artist**
- p. 217

- p. 245

**Irregular Schedules, Sustained Operations, and Napping**
- p. 258

**Minimal Sleep to Maintain Performance: The Search for Sleep Quantum in Sustained Operations**
- p. 271

**Sustained Operation Studies: From the Field to the Laboratory**
- p. 280

**Polyphasic Behavior, Napping, and Sleep Disorders**
- p. 301

**Napping Behavior in Narcoleptic Patients: A Four-Hour Cycle in Slow Wave Sleep**
- p. 318

**Narcolepsy and the Pathological Aspects of Multiple Napping**
- p. 335

**Index**
