Preface

Contributors

In Memoriam

Otto Detlev Creutzfeldt, 1927-1992

W. Cheyne McCallum, 1930-1991

Alexander Iljitsch Roitbak, 1919-1991

What is a Generator Like? p. 1

DC Potentials of the Brain p. 9

Activity of Single Neurons and Their Relationship to Normal EEG Waves and Interictal Epilepsy Potentials in Humans p. 21

Determinants of CNV Amplitude p. 45

Changes of Slow Brain Potential Shifts Following Failure p. 63

Association Cortex Contributions to the Human P3 p. 71

Interactions between the DC Potential of the Brain and Slow Potential Shifts under Mental Load p. 85

The "Oddball CNV" as Indicator of Information Processing in Healthy Subjects and Patients with Panic Disorders p. 97

Lateralization of Slow Brain Potentials and Preparatory Processes p. 103

The Genesis of Cortical Event-Related Potentials: Excitatory and Inhibitory Contributions p. 111

Prolonged Unstable Depression: A Modified Manifestation of Spreading Depression in Rat Hippocampus p. 129

Modulation of Glutamate Responses by Noradrenaline and GABA in Neo- and Archicortical Structures p. 139

Extracellular Changes of Aspartate, Glutamate, and Taurine in Relation to DC Changes during Complete Cerebral Ischemia and Cortical Spreading Depression p. 145

Evoked Field Potentials - Beyond Correlates of Behavior: An Approach to Determining the Neural Mechanism of Behavior p. 151

Cortical Slow Potentials, Depolarization of Glial Cells, and Extracellular Potassium Concentration p. 169

Voltage- and Ligand-Gated Membrane Currents of Identified Glial Cells in the Hippocampal Slice p. 179

Contributions of Extracellular Potassium Increases to Transient Field Potentials (Review of Data) p. 191

Cornea-Negative and Cornea-Positive Slow Components of the ERG and Light-induced Extracellular Potassium Changes p. 203

Magnetoencephalographic Signals and Their Registration p. 221

Neuromagnetism and Source Location p. 229

Measurement of Neuromagnetic Signals p. 235

Extracranial Slow Magnetic Field Changes during Epileptic Activity p. 243

DC Shifts and Event-related Potentials Associated with Workload in a Dual Task Situation p. 253

Frontomesial Activation during Spatial Bilateral Coordination: Tentative Conclusions on SMA Function p. 269

Phasic and Tonic Changes of the Mean Alpha Frequency (MAF) of the EEG during Motor p. 273 Performance
