Message from the General Chair

Message from the Program Co-Chairs

Program and Organizing Committees

Referees

Invited Talk: "On the Success of Stochastic Petri Nets" p. 2
Evaluation of High-Level Petri Nets by Means of Aggregation and Decomposition p. 11
Fixed Point Iteration Using Stochastic Reward Nets p. 21
Numerical Analysis of Stochastic Marked Graph Nets p. 32
Approximate Mean Value Analysis Technique for Non-Product Form Solution Stochastic Petri Nets: An Application to Stochastic Marked Graphs p. 42
Numerical Analysis of Superposed GSPNs p. 52
Petri Net Model of a Dynamically Partitioned Multiprocessor System p. 73
Modeling a Scalable High-Speed Interconnect with Stochastic Petri Nets p. 83
Performance Evaluation of Non-Markovian Stochastic Event Graphs p. 94
Transient Analysis of Markov Regenerative Stochastic Petri Nets: A Comparison of Approaches p. 103
Preemptive Repeat Identical Transitions in Markov Regenerative Stochastic Petri Nets p. 113
Invited Talk: "Performance and Formal Design: A Process Algebraic Perspective" p. 124
Characterization of Timed Well-Formed Petri Nets Behavior by Means of Occurrence Equations p. 127
Efficient Simulation of SWN Models p. 137
Giving a Net Semantics to Markovian Process Algebra p. 169
One-Dependent Cycles and Passage Times in Stochastic Petri Nets p. 191
Performance Optimization of Event Graphs Modeling Manufacturing Systems p. 203
Using the Probabilistic Evaluation Tool for the Analytical Solution of Large Markov Models p. 206
Stochastic Modeling Using DSPNexpress p. 208
TiPNet: A Graphical Tool for Timed Petri Nets p. 212
The Fluid Stochastic Petri Net Simulator p. 214
UltraSAN Version 3 Overview p. 216
TOMSPIN - A Tool for Modelling with Stochastic Petri Nets p. 218
