Cooperating in Design and Development

Task-Oriented Development of Intelligent Information Systems p. 206

CODA - A GROUPBASE-System for Cooperative Design Applications p. 220

Role Conflict in Groupware p. 229

Agent Interactions

A Planning Algorithm for Distributed Manufacturing p. 237

The Acceptance Relation and the Specification of Communicating Agents p. 247

Distributed Objects in a Federation of Autonomous Cooperating Agents p. 256

O-Raid: Experiences and Experiments p. 266

Information Semantics

Modelling the Real World by Multi-World Data Model p. 279

Declarative Semantics of Interoperable Data and Knowledge Bases p. 291

Detecting Semantic Violations in Generalised Classification Structures p. 300

Application Modelling in Heterogeneous Environments Using an Object Specification Language p. 309

Keynote Address: Intelligent and Cooperative Information Systems from the Perspective of Knowledge Engineering

Distributed Transaction Management

A Semantic-Based Nested Transaction Model for Intelligent and Cooperative Information Systems p. 321

Enforcing Data Dependencies in Cooperative Information Systems p. 332

Cooperating Transactions in a Versioned Database p. 342

Rule Management and Reasoning

The Reflective Approach for Data-Driven Rules p. 350

Restricting Query Relaxation through User Constraints p. 359

Intelligent Modifications in a Distributed Knowledge-Representation Architecture p. 367

Addendum p. 376

Author Index p. 382
