Foreword

Committees

Managing Complexity in Secure Networks p. 2
The Multipolicy Paradigm for Trusted Systems p. 19
An Outline of a Taxonomy of Computer Security Research and Development p. 33
A New Paradigm for Trusted Systems p. 36
New Paradigms for High-Assurance Software p. 42
Confidentiality, Integrity, Assured Service: Tying Security All Together p. 48
A Shift in Security Modeling Paradigms p. 57
Prospect on Security Paradigms p. 62
Integration of Formal and Heuristic Reasoning as a Basis for Testing and Debugging Computer Security Policy p. 69
Secure Computing with the Actor Paradigm p. 76
Bell and LaPadula Axioms: A "New" Paradigm for an "Old" Model p. 82
Application Level Security Using an Object-Oriented Graphical User Interface p. 105
We Need to Think About the Foundations of Computer Security p. 120
The Evolved Threat Paradigm: Look Who's Wearing the Black Hats! p. 126
External Consistency in a Networking Environment p. 131
Towards a Task-Based Paradigm for Flexible and Adaptable Access Control in Distributed Applications p. 138
How Responsibility Modeling Leads to Security Requirements p. 143
Neighborhood Data and Database Security p. 150
Security in an Object-Oriented Database p. 155
Computer Security by Redefining What a Computer Is p. 160
Modeling Multidomain Security p. 167
Security is Fuzzy! Applying the Fuzzy Logic Paradigm to the Multipolicy Paradigm p. 175
Identification and Authentication When Users Have Multiple Accounts p. 185
The Reference Monitor: An Idea Whose Time Has Come p. 192
Author Index p. 198
