Message from the General Chair
Message from the Program Chair
Organizing and Program Committees
Referees
Software Tool Evaluation Methodology p. 3
A Tool for Monitoring Software-Heterogeneous Distributed Object Applications p. 11
Integrating Visualization Support into Distributed Computing Systems p. 19
MASSIVE: A Distributed Virtual Reality System Incorporating Spatial Trading p. 27
Real-Time Causal Message Ordering in Multimedia Systems p. 36
A New Protocol for Bandwidth Regulation of Real-Time Traffic Classes in Internetworks p. 44
A Distributed Table-Driven Route Selection Scheme for Establishing Real-Time Video Channels p. 52
Guaranteeing End-to-End Deadlines in ATM Networks p. 60
Fault-Tolerant External Clock Synchronization p. 70
Efficient Failure Discovery with Limited Authentication p. 78
Causal Separators for Large-Scale Multicast Communication p. 83
Coterie Templates: A New Quorum Construction Method p. 92
Exploiting Transaction Semantics in Multidatabase Systems p. 101
A Practical Technique for Asynchronous Transaction Processing p. 110
Distributed Lock Management for Mobile Transactions p. 118
MPI Programming Environment for IBM SP1/SP2 p. 127
I-TCP: Indirect TCP for Mobile Hosts p. 136
Single Connection Emulation (SCE): An Architecture for Providing a Reliable Multicast Transport Service p. 144
A Distributed K-Mutual Exclusion Algorithm p. 153
A Fast Distributed Modular Algorithm for Resource Allocation p. 161
An Efficient Distributed Deadlock Detection Algorithm p. 169
"Computer Supported Cooperative Work - New Challenges or Old Problems?" p. 180
"Future Distributed Embedded and Real-Time Applications Will Be Adaptive - Meanings, Challenges and Research Paradigms" p. 183
Analysis of Resource Lower Bounds in Real-Time Applications p. 188
Schedulability-Oriented Replication of Periodic Tasks in Distributed Real-Time Systems p. 196
Distributed Pipeline Scheduling: End-to-End Analysis of Heterogeneous, Multi-Resource Real-Time Systems p. 204
Server Recovery Using Naturally Replicated State: A Case Study p. 213
Performance Evaluation of Three Logging Schemes for a Shared-Nothing Database Server p. 221
Message Logging: Pessimistic, Optimistic, and Causal p. 229
Comparing Kernel-Space and User-Space Communication Protocols on Amoeba p. 238
Techniques for Global Optimization of Message Passing Communication on Unreliable Networks p. 246
A Thread-Based Interface for Collective Communication on ATM Networks p. 254
An Object-Based Distributed Computing Environment Based on a Reflective Architecture p. 263
A Multiversion Concurrent Object-Model for Distributed and Multiuser Environments p. 271
Adaptive Placement of Method Executions within a Customizable Distributed Object-Based Runtime System: Design, Implementation, and Performance p. 279
Constructing a Configurable Group RPC Service p. 288
Configuration-Level Optimization of RPC-Based Distributed Programs p. 307
Selective Broadcast Data Distribution Systems p. 317
An Efficient Optimal Reconfiguration Algorithm for FBRNs p. 325
Distributed Management by Delegation p. 333
"Intelligent Agents in Distributed Systems" p. 342
"How are We Going to Pay for This? Fee-for-Service in Distributed Systems - Research and Policy Issues" p. 344
Probing and Fault Injection of Protocol Implementations p. 351
Test Sequence Generation from Formal Specifications of Distributed Programs p. 360
Dynamic Techniques for Minimizing the Intrusive Effect of Monitoring Actions p. 368
EVEREST: An Event Recognition Testbed p. 377
Distributed Join Processing Using Bipartite Graphs p. 387
General Design of Grid-Based Data Replication Schemes Using Graphs and a Few Rules p. 395
Maintaining Consistency of Data in Mobile Distributed Environments p. 404
Specifying Weak Sets p. 414
Distributed Algorithms for Detecting Conjunctive Predicates p. 423
Characterizing and Detecting the Set of Global States Seen by all Observers of a Distributed Computation p. 431
Implementing Sequentially Consistent Shared Objects Using Broadcast and Point-to-Point Communication p. 439
A Competitive Analysis for Retransmission Timeout p. 450
Write Caching in Distributed File Systems p. 457
Parallel Processing on Networks of Workstations: A Fault-Tolerant, High Performance Approach p. 467
Hardware for Fast Global Operations on Workstation Cluster Multicomputers p. 475
Performance Impact of Scheduling Discipline on Adaptive Load Sharing in Homogeneous Distributed Systems p. 484
Mapping Concurrently-Communicating Modules onto Mesh Multicomputers Equipped with Virtual Channels p. 493
An Efficient Task Allocation Scheme for Two-Dimensional Mesh-Connected Systems p. 501
Synthesis of Protocol Entities' Specifications from Service Specifications in a Petri Net Model with Registers p. 510
Distributed Implementation of Multi-Rendezvous in LOTOS Using the Orthogonal Communication Structure in Linda p. 518
Specification of a Secured Multi-Server MMS Protocol p. 526
"Distributed Computing in 2010" p. 535
