Message from a Workshop Co-Chair

Workshop Committees

Why Time-Triggered Architectures will Succeed in Large Hard Real-Time Systems p. 2
Evolution of the CHORUS Open Microkernel Architecture: The STREAM Project p. 10
A Platform Architecture for Future Telecommunication Services and Open Distributed Applications p. 18
Experiences with the Bay Area Gigabit Network Testbed p. 26
Real-Time Distributed Computing p. 34
Time in Distributed Systems Cooperation and Communication Models p. 41
Generating Dedicated Runtime Platforms for Distributed Applications - A Generic Approach p. 50
Compact, Low-Cost, but Real-Time Distributed Computing for Computer Augmented Environments p. 56
Distributing Virtual Worlds in a Teleteaching Environment p. 66
The Distributed and Interactive Courseware Environment (DICE) p. 76
Centralized versus Distributed Schemes for Videoconferencing p. 85
Towards Integrated QoS Management p. 94
A Programming Model for Real-Time Applications in Open Distributed Systems p. 104
Flexible Manufacturing and High Performance System for Steel Plants p. 112
Environment for Development of Reliable Real-Time Distributed Applications p. 120
Realizing a Soft Real-Time Framework for Supporting Distributed Multimedia Applications p. 128
How Effective Are One-Bit Protocols? p. 135
Modeling for Interactive Presentation and Navigation of Time-Dependent Multimedia Information p. 143
Flexible Computing: Basic Concepts, Design and Application p. 152
Distributed Computing using Autonomous Objects p. 160
Scalable Linear Algebra Software Libraries for Distributed Memory Concurrent Computers p. 170
Transparent Optical Networks for High-Performance Distributed Computing p. 178
Deadlocks in Distributed Systems: Request Models and Definitions p. 186
Operating System Support for the Trader in Distributed Real-Time Environments p. 194
MANDAS: Management of Distributed Applications and Systems p. 200
The Impact of Group Communication Paradigms on Groupware Support p. 207
NTT’s RandD and Deployment Activities for the Information Highway in Japan p. 216
A Software Technology Plan for National Information Infrastructure p. 224
Application of X.500 and X.700 Standards for Supporting Personal Communications in Distributed Computing Environments p. 232
Information and Distribution Systems in the Retail Industry p. 242
Distributed Techniques in Software Systems Integration p. 252
Executable Specifications for Distributed Software Systems p. 257
An Engineering Approach towards Action Refinement p. 266
A Clustering Algorithm for Object-Oriented Development of Distributed Computing System Software p. 274
Fault Diagnosis for a Class of Distributed Control Multistage Interconnection Networks
Architectural Issues in Adopting Distributed Shared Memory for Distributed Object Management Systems
Design and Analysis of a Multiprocessor System with Extended Fault Tolerance
Developing High-Performance Scientific Applications in Distributed Computing Environments
Characterization of Consistent Global Checkpoints in Large-Scale Distributed Systems
Can Real-Time Local Area Network Protocols be Made Robust?
A Generic Multicast Primitive to Support Transactions on Replicated Objects in Distributed Systems
How to Commit Concurrent, Non-Isolated Computations
Specification and Validation of Multimedia Protocols using RT-LOTOS
Adaptable Mobile Systems
Intelligent Congestion Control in ATM Networks
A Design Methodology for Protocol Processors
An Approach to Information Security in Distributed Systems
Fragmentation of Confidential Objects for Data Processing Security in Distributed Systems
Modeling Complex Access Control Policies in Distributed Systems
One Service Management Architecture for Distributed Systems Using DCE
BVPN (Broadband Virtual Private Network): A Flexible, High-Speed, Enterprise Network Architecture
Ultra High-Speed Networking Solution: Fibre Channel Architecture and Its Implementation
An Approach to Isochronous Slot Reuse for Multimedia Services on DQDB Network
The Reliable Distributed Network Management Platform
Video-On-Demand: Experience with Protocols and their Implementation
Formal Timing Verification Techniques for Distributed System
Garbage Collection in the Larchant Persistent Distributed Shared Store
Distributed Applications Construction Environment
Enforcing Management Policies in Distributed Systems
A Leader Election Algorithm in a Distributed Computing System
Reliable Computing over Mobile Networks
Multicast Routing Algorithms in High Speed Networks
Compile-Time Error Detection in Temporal Specifications for Interactive Multimedia Applications
A Network Channel Buffer Scheduling Algorithm for an Interactive VOD Server
Dynamic Load Balancing in Distributed Computer Systems with Star Topology
Toward New-Generation Real-Time Object-Oriented Computing
