Message from the General Chair
Message from the Program Co-chairs
Symposium Committee
Program Committee
Referees
An Integrated Approach for Criticality Prediction p. 14
Detection of Fault-Prone Program Modules in a Very Large Telecommunications System p. 24
Analysis of Review's Effectiveness Based on Software Metrics p. 34
Analysis of Failures in the Tandem NonStop-UX Operating System p. 40
An Experience Report on Requirements Reliability Engineering Using Formal Methods p. 52
The Role of Testing in the B Formal Development Process p. 58
Systems Specification, Analysis, and Validation by Means of Timed Predicate/Transition Nets and Logic Programming p. 68
An Approach to Safety and Correctness Verification of Software Design Specification p. 78
Antirandom Testing: Getting the Most out of Black-Box Testing p. 86
System Testing with an AI Planner p. 96
Test Generation for Boolean Expressions p. 106
Software Quality Evaluation in Europe - Past Experiences and Future Perspectives p. 118
On the Correlation Between Code Coverage and Software Reliability p. 124
A Test Coverage Notion for Logic Programming p. 133
Fault Localization Using Execution Slices and Dataflow Tests p. 143
Software Reliability in COSTS-Based Systems p. 154
Dependable Computing Depends on Structured Fault Tolerance p. 158
Dependability of Modular Software in a Multiuser Operational Environment p. 170
Analysis of Software Rejuvenation Using Markov Regenerative Stochastic Petri Net p. 180
An Additive Reliability Model for the Analysis of Modular Software Failure Data p. 188
Hyper-Geometric Distribution Software Reliability Growth Model with Imperfect Debugging p. 195
A New Method for Increasing the Reliability of Multiversion Software Systems Using Software Breeding p. 202
Performability Modeling of N-Version Programming Technique p. 209
Predicting Software's Minimum-Time-to-Hazard and Mean-Time-to-Hazard for Rare Input Events p. 229
An Assessment of Software Quality in a C++ Environment p. 240
BNR/NORTEL: Path to Improve Product Quality, Reliability, and Customer Satisfaction p. 256
