Preface
Program Co-Chairs' Message
FTDCS '97 Committees
From Legacy RPC Services to Distributed Objects p. 2
Protocols versus Objects: Can Models for Telecommunications and Distributed Processing Coexist? p. 8
Replicating Objects using the CORBA Event Service? p. 14
A Software Platform for Secure Applications Based on CORBA p. 22
Intrusion Ripple Analysis in Distributed Information Systems p. 28
Cryptographic Key Recovery p. 34
Firewall Placement in a Large Network Topology p. 40
Interdomain Access Control with Policy Routing p. 46
Distributed Transaction Processing as a Reliability Concept for Mobile Agents p. 59
A Hierarchical Mapping Scheme for Mobile Agent Systems p. 66
A Distributed Simulation Based Monitoring System p. 72
Entry Consistency versus Lazy Release Consistency in DSM Systems: Analytical Comparison and a New Hybrid Solution p. 78
Towards an Efficient Probabilistic Deadlock Detection Method for Multidatabase Systems p. 84
The Universality of a Class of (2 log[subscript 2][N-1])-stage Interconnection Networks p. 92
A Solution to Atomic Commitment Based on an Extended Consensus Protocol p. 98
Impact of Rollback Recovery to Program Locality of Reference and Page Replacement Policies p. 104
An Internet Collaborative Environment for Sharing Java Applications p. 112
Cooperative Concurrency Control on the Web p. 118
Experiences with the Electronic Classroom - QoS Issues in an Advanced Teaching and Research Facility p. 124
Nomadic Computing and CDMA p. 132
Migrating State Information in Mobile Environments p. 138
Intelligent Handling of Communication Media p. 144
Performance of Cache Coherency Schemes in a Shared Disks Transaction Environment p. 154
Portable Memory p. 162
Performance Analysis of a Dynamic Control Policy for PRMA Protocols p. 168
Available Fail-Safe Systems p. 176
Consensus: The Big Misunderstanding p. 183
Can We Rely on COTS Microkernels for Building Fault-Tolerant Systems? p. 189
Distributed Fault Management over ATM Networks p. 196
Multi-Criterion Coherence Protocol for Distributed Shared Memory p. 202
Extended Connection Models for Advanced Applications p. 208
Plenary Panel: Internet Security
Future Trends in Internet Security p. 216
Internet Security Despite Untrustworthy Agents and Components p. 218
Profiles and Protocols for the Internet Public-Key Infrastructure p. 220
Scalable Security in an Unimaginably large Internet p. 225
A Research on Collaboration Net p. 228
A Process-Centered Software Engineering Environment with Network Centric Computing p. 234

Analysing the Behaviour of Distributed Software Architectures: A Case Study p. 240
Toward Globally Optimal Resource Management in Large-Scale Real-Time Computer Systems p. 248
A Comparison of Scheduling Algorithms for Real Time Distributed Transactional Systems p. 257

Time Constraints Verification Methods Based on Time Petri Nets p. 262
An Efficient Causal Order Algorithm for Message Delivery in Distributed Systems p. 270
Causality between Nonatomic Poset Events in Distributed Computations p. 276
Scheduling for Distributed Computing p. 284

Performance Evaluation of Scheduling Algorithm in a Real-Time Distributed Transactional System p. 290

A Scheduling Algorithm for Aperiodic Groups of Tasks in Distributed Real-Time Systems and its Holistic Analysis p. 296

A Temporal Model for Fault-Tolerant Parallel Programs p. 304
Temporal Firewalls in Large Distributed Real-Time Systems p. 310
On the Role of Time in Distributed Systems p. 316

An Adaptive Scheduler for Multimedia Systems p. 324
Enhancing the Distributed Link Service for Multimedia and Collaboration p. 330
Towards Support for Heterogeneous Multimedia Communications p. 336

Author Index p. 345
