Message from the Co-Chairs
Symposium Committee

Supporting Real-Time Multimedia Applications with Distributed Object Controlled Networks p. 2

The Time-Triggered Architecture p. 22

Exception Handling in Object-Oriented Real-Time Distributed Systems p. 32

Specifying and Measuring Quality of Service in Distributed Object Systems p. 43

Providing End-to-End QoS Assurances in CORBA-Based System p. 53

A Reliable Mobile Agents Architecture p. 64

Responsive Computing with CORBA p. 73

A Reliable Software Architecture for Complex Embedded Systems p. 90

Concurrency Control in Real-Time Object-Oriented Systems: The Affected Set Priority Ceiling Protocols p. 96

Using Ordered and Atomic Multicast for Distributed Deadlock Prevention p. 106

Associative Prioritized Worker Model with Priority Inheritance Protocol p. 117

RT-HashQ for RTO Scheduling p. 124

Pseudo-Active Replication of Objects in Heterogeneous Clusters p. 132

An Admission Control for Video Broadcast Systems p. 134

Objects Collection Management in Multidimensional DBMS Data Model p. 136

An Object Oriented CHILL Debugger p. 140

Evolution of a Distributed, Real-Time, Object-Based Operating System p. 142

SPLAW: A Computable Agent-Oriented Programming Language p. 144

A Purpose-Oriented Access Control Model for Object-Based Systems p. 146

Coordinated Atomic Actions in Modelling Objects Cooperation p. 152

Building Middleware for Real-Time Dependable Distributed Services p. 162

State Restoration in a COTS-Based N-Modular Architecture p. 174

Real Time in a TLA-Based Theory of Reactive Systems p. 186

BDL, A Language of Distributed Reactive Objects p. 196

Specification of Real-Time Interaction Constraints p. 206

Supporting the Analyst when Reasoning on Requirements Specifications for Real-Time and Distributed Systems p. 215

Checked Transactions in an Asynchronous Message Passing Environment p. 222

Implementation of a Customizable Fault Tolerance Framework p. 230

Integration of Autonomous Decentralized Systems with Different Fault Tolerance Requirement Levels p. 240

A Method of Test Cases Generation for Real-Time Systems p. 249

A Soft Real-Time TMO Platform - WTMOS - and its Implementation Techniques p. 256

An Object-Oriented Extension to PEARL90 p. 265

An Approach to Distributed Component-Based Real-Time Application Software Development p. 275
Integrated Environment Based on Object-Oriented Methodology for Real-time Systems p. 284

Invocation of Real-Time Objects in a CAN Bus-System p. 298

Real Time Resource Allocation for Multimedia Object Communication p. 308

Simulation and Analysis of Real-Time Concurrent Object Models p. 318

Timing Analysis in OO System Life-Cycles p. 327

Compositional Specification and Structured Verification of Hybrid Systems in cTLA p. 335

An Adaptive Approach to Object-Oriented Real-Time Computing p. 342

Quality-Based Flexibility in Distributed Objects p. 350

Distributed Observable/Observer: A Distributed Real-Time Object-Communication Mechanism p. 358

Validating the Design of Dependable Systems p. 364

Automating Regression Testing for Real-Time Software in a Distributed Environment p. 373

Experience of Responsiveness Verification for Connection Establishment Protocols p. 383

A CORBA-Based Remote Monitoring System for Factory Automation p. 396

CORBA in Real-Time Settings: A Problem from the Manufacturing Domain p. 403

Architecture and Object Model for Distributed Object-Oriented Real-Time Databases p. 414

The Navigational Aspects of the Logical Design of User Interfaces p. 425

Active Rule Processing in the BioCompose Database p. 431

Distributed Object-Oriented Real-Time Systems using a Hybrid Model of Ada 95's Built-in Distributed Capability and Emerging Real-Time CORBA Capabilities p. 440

Real-Time Inter-ORB Protocol on Distributed Environment p. 449

Object-Oriented Design of Real-Time Telecom Systems p. 458

A Dependable Distribution-Transparent Remote Method Invocation Model for Object-Oriented Distributed Embedded Computer Systems p. 467

Using the Object Paradigm for Distributed Real-Time Systems p. 478

Concepts and Features of Processes Flying Technology p. 481

Author Index p. 485
