Foreword
Program Committee

Applying Data Mining Techniques for Descriptive Phrase Extraction in Digital Document Collections p. 2

KeyGraph: Automatic Indexing by Co-Occurrence Graph Based on Building Construction p. 12

Discovering Web Access Patterns and Trends by Applying OLAP and Data Mining Techniques on Web Logs p. 19

Binary Partition Based Algorithms for Mining Association Rules p. 30

A Distributed Digital Library Architecture Incorporating Different Index Styles p. 36

Thesaurus Federations: A Framework for the Flexible Integration of Heterogeneous, Autonomous Thesauri p. 46

Integrating New Document Types into Digital Libraries p. 56

Multi-Resolution Cache Management in Digital Virtual Library p. 66

Personal Interface Mechanism on Digital Library p. 76

An Indexing Model for Structured Documents to Support Queries on Content, Structure, and Attributes p. 88

Advanced Hypermedia Indexing of Documents in a Deductive Database System p. 98

Smart Indexes for Efficient Browsing of Library Collections p. 107

An Object-Based Information Retrieval Model: Toward the Structural Construction of Thesauri p. 117

NCSTRL+: Adding Multi-Discipline and Multi-Genre Support to the Dienst Protocol Using Clusters and Buckets p. 128

Electronic Publishing, Storage, Dissemination and Retrieval of a Scientific Journal through the Web p. 137

Towards an Archival Intermemory p. 147

A Methodology for the Enhancement of a Hypertext Version of a Textbook by the Automatic Insertion of Links in the Subject Index p. 157

Story Segmentation and Detection of Commercials in Broadcast News Video p. 168

Image Processing in the Alexandria Digital Library Project p. 180

Multilingual Input System for the Web - An Open Multimedia Approach of Keyboard and Handwriting Recognition for Chinese and Japanese p. 188

Query Optimization for Structured Documents Based on Knowledge on the Document Type Definition p. 196

A Three-Level User Interface to Multimedia Digital Libraries with Relaxation and Restriction p. 206

WebDB: A Web Query System and Its Modeling, Language, and Implementation p. 216

Web Warehousing: An Algebra for Web Information p. 228

Assessing Metadata Quality: Findings and Methodological Considerations from an Evaluation of the U.S. Government Information Locator Service (GILS) p. 246

Multilevel and Graphical Views of Metadata p. 256

Logical Information Modeling of Web-Accessible Heterogeneous Digital Assets p. 266

A Metadata Architecture for Digital Libraries p. 276

Semantic Relations in a Medical Digital Library p. 290

Concept-Based Query in Visual Information Systems p. 299
