Photoeffects: concepts in Paul Goerlich’s time and at present  p. 2
New developments in photon metrology by use of BESSY synchrotron radiation  p. 14
Spectral flux measurements in the UV and VUV  p. 24
Recent advances in solar radiometry at the National Renewable Energy Laboratory  p. 31
Measurements of thermal radiation induced by laser excitation of semiconductor structures  p. 42
Integrated photodiode arrays: solid state image sensors  p. 48
Calibration of germanium photodetectors used for measurements in optical fiber telecommunications  p. 63
Adaptive processing of spectral responsivity measurements  p. 73
Dynamic analysis of solar elements  p. 82
Calibration possibilities of luminous intensity and illuminance  p. 92
Standard reference material set for spectrophotometer calibration  p. 100
Colorimetry with filtered detectors  p. 106
DC substitution methods in metrology  p. 112
High-resolution spatial uniformity of surface reflectance and response of silicon photodiodes  p. 121
First measuring results concerning a new thin-film absolute radiometer  p. 132
Study and realization of a pyroelectric detector for absolute pulsed laser energy measurement  p. 142
Attenuation characteristics of an all-silica UV fiber  p. 150
Optical pressure sensor using a low-coherence light source with a highly birefringent fiber  p. 160
Transportable UV-measurement equipment  p. 166
Inspection of rough surfaces by optical triangulation  p. 169
