Conference Committee

Fuzzy modeling of the manufacturing processes p. 2
Tool breakage detection in face milling by an unsupervised neural network p. 10
Kinematically optimal robot placement for minimum time coordinated motion p. 22
Learning control of optical lens machining p. 32
Inspection planning for coordinate metrology p. 40
Direct generation of event-timing equations for generalized flow shop systems p. 50
Manufacturing dispatching controller design and deadlock avoidance using a matrix equation formulation

Solution to the next best view problem for automated CAD model acquisition of free-form objects using range cameras p. 78
Sensor configuration for error detection and recovery p. 90
Optimal production flow control for a flexible manufacturing system p. 102
Data management for error compensation and process control p. 114
Fractal characteristic in the wearing of cutting tool p. 124
Analysis of accuracy of the two typical built-up ball leadscrew joints p. 133
Experimental simulation of on-line measurement of screw-thread steel bars p. 139
Autonomous agent for on-machine acceptance of machined components p. 146
Knowledge-based adaptive neural control of drum level in a boiler system p. 160
Intelligent vision-based part feeding on dynamic pursuit of moving objects p. 172
Computer-aided control in nonround process p. 184
DFX via the Internet p. 192
Simulation and implementation of an open architecture controller p. 196
Manufacturing: workers, technology, and management p. 205
Just-enough-information: a new paradigm for production scheduling in a manufacturing supply network p. 209

Indentation simulation on brittle materials by molecular dynamics p. 214
Simulation and analysis of complex human tasks p. 225
Distributed simulation approach for enabling cooperation between entities in heterarchical manufacturing systems p. 234
Implementation of simulated human grasping for manufacturing tasks p. 243
Addendum p. 253
Author Index p. 254
