Conference Committee

Introduction

Molecular contrast in optical coherence tomography using a pump-probe technique p. 1
Portable broadband light sources using a femtosecond Nd:glass laser and nonlinear fiber for ultrahigh-resolution OCT imaging p. 4
Molecular-species-sensitive optical coherence tomography using coherent anti-Stokes Raman scattering spectroscopy p. 9
Ultrahigh-resolution OCT using white-light interference microscopy p. 14
Imaging of cell layers by differential phase contrast optical coherence microscopy p. 22

Wide-field coherence gated imaging: photorefractive holography and wide-field coherent heterodyne imaging p. 26
Imaging of tumor necroses using full-frame optical coherence imaging p. 34
Application of VRML for three-dimensional interactive real-time comparison of OCT structure with standard histology p. 42
Real-time in vivo ophthalmic imaging by ultrafast spectral optical coherence tomography p. 50
Ultrahigh-resolution optical coherence tomography for enhanced visualization of retinal pathology p. 55
Multiplanar OCT/confocal ophthalmoscope in the clinic p. 59
Coherence gating and adaptive optics in the eye p. 65
In vivo depth-resolved birefringence measurements of the human retinal nerve fiber layer using polarization-sensitive optical coherence tomography p. 73
Ultrahigh-resolution OCT of prostate pathology in the clinic using a portable Cr:forsterite laser p. 78
Complementary use of optical coherence tomography and 5-aminolevulinic acid induced fluorescent spectroscopy for diagnosis of neoplastic processes in cervix and vulva p. 81

Blinded recognition of optical coherence tomography images of human mucosa precancer. p. 89

OCT imaging of the larynx: a feasibility study p. 95
Novel phase-shifting algorithm to achieve high-speed long-depth range probing by frequency domain optical coherence tomography p. 101
Distortion-corrected imaging using projected index computed tomography p. 109
Controls of spectral shape and dispersion mismatch for high-resolution optical coherence tomography p. 115
Measurement of scattered light Wigner functions by phase space tomography and implications for parallel OCT p. 120
Miniature endoscope for a combined OCT-LIF system p. 129
Scanning mirror for optical coherence tomography using an electrostatic MEMS actuator p. 139
Ultrahigh-resolution optical coherent tomography using continuum generation from a photonic crystal fiber p. 147
OCT resolution enhancement using long-period fiber grating and erbium-doped fiber p. 154

Interferometric system with resolution better than coherence length for determination of geometrical thickness and refractive index of a layer object p. 163
Polarization-sensitive low-coherence speckle spectroscopy of scattering media p. 170
Real-time multifunctional optical coherence tomography p. 179
DSP-based optical Doppler tomography system for real-time signal processing p. 187
Time-resolved spectroscopic optical coherence tomography for diffusion measurements p. 197
Quantitative attenuation measurements with single-mode fiber-based OCT p. 205
Self-referenced Doppler optical coherence tomography p. 213
Power optical Doppler tomography imaging of blood vessel in human skin and M-mode Doppler imaging of blood flow in chick chorioallantoic membrane p. 225
Doppler angle and flow velocity estimation using conventional single-probing-beam optical Doppler tomography p. 232
Transversal Doppler optical coherence tomography (TDOCT) for high-resolution vectorial flow measurements p. 244
Monitoring regional blood flow in rat mesentery under drug's effect by using laser speckle imaging p. 250
Three-dimensional OCT imaging of the embryonic chick heart p. 259
Burn depth determination in human skin using polarization-sensitive optical coherence tomography p. 263
Oxygen saturation dependent index of refraction of hemoglobin solutions assessed by OCT p. 271
Cancellation of the polarization distortions in fiber-based polarization-sensitive Mueller-matrix optical coherence tomography p. 282
Measurement of water absorption in human cornea with differential absorption optical coherence tomography p. 290
In vivo OCT assessment of rabbit corneal hydration and dehydration p. 295
In vivo imaging of human skin: a comparison of optical coherence tomography and confocal laser scanning microscopy p. 299
Dynamic study of irradiated artificial skin using OCT p. 307
Enhance light penetration in tissue for high-resolution optical imaging techniques by the use of biocompatible chemical agents p. 314
Phase-resolved polarization-sensitive optical coherence tomography imaging of tendon and muscle p. 320
Wavelet and eigenfrequency spectral analysis of color Doppler optical coherence tomography p. 329
Optical coherence tomography using a photorefractive polymer composite p. 333
Arterial pulse shape measurement using self-mixing interferometry p. 341
Glucose dispersion measurement using white-light LCI p. 348
Ultrafast parallel coherence gating for an adaptive optics retina camera p. 352
Polarization-sensitive OCT applied to equine tendon and bovine intervertebral disk p. 360
Measuring blood flow dynamics using DOCT and Doppler amplitude optical coherence tomography (DAOCT) p. 366
Addendum p. 375
Author Index p. 376
