The constancy myth, the vocabulary of color perception, and the ATD04 model p. 1
Vision channels, contrast sensitivity, and functional vision p. 15
Local channel structure of sustained peripheral vision p. 26
Training directionally selective motion pathways can significantly improve reading efficiency p. 34
Bio-inspired color image enhancement p. 46
Human-visual-system-inspired tone mapping algorithm for HDR images p. 57
Generating stimuli of arbitrary spectral power distributions for vision and imaging research p. 69
Content adaptation for visual impairment in MPEG-21 p. 80
Perception of color and space in virtual reality: a comparison between a real room and virtual reality models p. 90
Stimulus synthesis for efficient evaluation and refinement of perceptual image quality metrics p. 99
Perceptual contributions of blocky, blurry, and fuzzy impairments to overall annoyance p. 109
Visibility of noise in natural images p. 121
Decontouring: prevention and removal of false contour artifacts p. 130
Implementation of a visual difference metric using commodity graphics hardware p. 150
Quality metrics for measuring end-to-end distortion in packet-switched video communication systems p. 162
Analysis and synthesis of motion patterns using the projective plane p. 174
Sporadic frame dropping impact on quality perception p. 182
Temporal masking effect on dropped frames at video scene cuts p. 194
Detection of inconsistent regions in video streams p. 202
Hyperacuity on high-resolution and very high resolution displays p. 211
Display characterization by eye: contrast ratio and discrimination throughout the grayscale p. 218
Evaluation of optimal sharpness enhancement for different image content and different display technologies p. 234
Analytical approach to the optimal linear matrix with comprehensive error metric p. 243
Reading performance with large fonts of high-resolution displays p. 254
Color appearance in peripheral vision p. 260
Automatic attention-based prioritization of unconstrained video for compression p. 272
From low-level perception to high-level perception: a coherent approach for visual attention modeling p. 284
Point-of-gaze analysis reveals visual search strategies p. 296
Perception of 3D shape from homogeneous and nonhomogeneous surface textures p. 307
Softness perceptive texture method p. 322
Biologically inspired feature-based categorization of objects p. 330
Quantitative subjective analysis of color tone perception and description by native speakers of Japanese p. 342
The utilization of human color categorization for content-based image retrieval p. 351
Indexing natural images for retrieval based on Kansei factors p. 363
Digital zoom for low-vision enhancement systems p. 376
Perceptual classification boundaries between two-dimensional shapes  p. 386
Vision-based navigation in a dynamic environment for virtual human  p. 397
Global semantic classification of scenes using ridgelet transform  p. 402
Can the high-level content of natural images be indexed using local analysis?  p. 414
Human detection in outdoor video  p. 426
Understanding of hand motion in sentence level using HMM  p. 434
Is the hMT+/V5 complex in the human brain involved in stereomotion perception? : an fMRI study  p. 444
