Conference Committee

Overview of the ANSI and international standards process p. 1
CIE Division 8: progress and plans p. 7
Challenges and progress in digital photography standards p. 14
Printing system perceptual-based gloss and gloss uniformity standards (INCITS W1.1) p. 26

INCITS W1.1 standards for perceptual evaluation of text and line quality p. 34
Digitization and metric conversion for image quality test targets: Part II p. 39
INCITS W1.1 macro-uniformity p. 44
Update on INCITS W1.1 standard for perceptual evaluation of micro-uniformity p. 52
Update on INCITS W1.1 standard for evaluating the color rendition of printing systems p. 55

Use of the first-order Wiener kernel transform in the evaluation of SQRIn and PIC quality metrics for JPEG compression p. 60
Circular-edge spatial frequency response test p. 71
Multidimensional image quality measure using singular value decomposition p. 82
Low-frequency MTF estimation for digital imaging devices using slanted-edge analysis p. 93
Scanner-based image quality measurement system for automated analysis of EP output p. 102

Identification of image noise sources in digital scanner evaluation p. 114
A simulation tool for evaluating digital camera image quality p. 124
Do experts and naive observers judge printing quality differently? p. 132
Appearance-consistent projector tolerant of various colored projection surfaces and ambient light WallShot p. 146
Predicting customer preference from objective image quality metrics for monochrome document products p. 155
Image quality scaling of electrophotographic prints p. 165
Memory-color test forms in real-world applications p. 176
ISO 20462: a psychophysical image quality measurement standard p. 181
Video quality assessment based on data hiding driven by optical flow information p. 190
Subjective quality assessment and the effect of context in expert and nonexpert viewers p. 201
Experimental congruence of interval scale production from paired comparisons and ranking for image evaluating p. 211
Louis Leon Thurstone in Monte Carlo: creating error bars for the method of paired comparison p. 222
Formula for the contrast sensitivity of the human eye p. 231
Digital TV image quality improvement considering distributions of edge characteristic p. 239
Study of colorimetric prediction model for DLP projection TV p. 247
Author Index p. 256
