High-power laser source with spectrally beam-combined diode laser bars  p. 1
Broad-area laser array synchronization using external cavity  p. 11
Compact tunable diode laser with diffraction-limited 1 watt for atom cooling and trapping  p. 17
Frequency locking and synchronization of nanosecond-pulsed broad-area lasers  p. 26
Improvement of the beam quality of a 1000-[mu]m-wide broad-area diode laser with self-injection phase locking in an external cavity  p. 33
Lateral mode selection in a broad-area laser diode by self-injection locking with a mirror stripe  p. 38
Development of high-brightness high-power fiber laser pump sources  p. 45
Reliable high-power single-mode GaAlAs/GaAs laser diodes mounted epi-side up  p. 49
Characterization of tapered diode laser bars for the use in high-power diode laser systems  p. 56
Improved optical fibers for enhanced coupling with high-power diode lasers  p. 65
Passively cooled diode laser for high-power applications  p. 71
DPSSL and FL pumps based on 980-nm telecom pump laser technology: changing the industry  p. 77
Effect of joint configuration on high-power diode laser welding of steel  p. 84
Chances and limitations of high-power diode lasers  p. 95
High-power direct-diode laser successes  p. 107
Reliability of high-power multimode pump modules  p. 116
Transient thermal tuning properties of single emitters in actively cooled high-power cm-bar arrays  p. 125
High-COMD nitridized InAlGaAs laser facets for high-reliability 50-W bar operation at 805 nm  p. 132
High-efficiency high-power 808-nm laser array and stacked arrays optimized for elevated temperature operation  p. 144
The influence of the position accuracy of a laser diode and the influence of the top copper layer thickness on the temperature distribution of the single emitter in connection with an active cooled heat-sink  p. 156
New material options for high-power diode laser packaging  p. 166
Mechanical stress-reducing heat sinks for high-power diode lasers  p. 176
High-power long-wavelength (1.4 to 1.5 [mu]m) laser array and stacked arrays  p. 188
High-power high-efficiency 910- to 980-nm broad-area laser diodes  p. 196
Thermal characteristics of high-power long-pulsewidth quasi-CW laser diode arrays  p. 203
Diode array reliability experiment  p. 212
