Quantum fluctuations and life
Quantum noise and quantum communication
Nonlocal effects and transfer fields for electronic noise in small devices p. 1
Extension of the characteristic potential method for noise calculation and its application to shot noise in semiconductor devices p. 16
Current noise in semiconductor nanoscale devices p. 28
Small- and large-signal trap-assisted GR noise modeling in semiconductor devices p. 37
Characterization and modeling of high-frequency noise in MOSFETs for RF IC design p. 49

MOSFET noise modeling and parameter extraction p. 61
Nonlocal transport and thermal noise of the nanoscale MOSFET p. 74
A comprehensive study of thermal noise in the MOS transistor p. 84
Influence of 2D electrostatic effects on the high-frequency noise behavior of sub-100-nm scaled MOSFETs p. 96
Noise in Si/SiGe and Ge/SiGe MODFET p. 107
Noise modeling and performance in 0.15-[mu]m fully depleted SOI MOSFET p. 122
Noise investigations of 90-nm VLSI CMOS technologies for analog integrated circuits at millimeter-wave frequencies p. 131
Modeling of noise behavior of graded bandgap channel MOSFET at GHz frequencies p. 141
Microwave noise in III-V- and SiGe-based HBTs : comparison, friends, and numbers p. 151
Investigation of the RF noise behavior of InP-based DHBT with InGaAs base and GaAsSb base p. 164

Accuracy assessment of compact RF noise models for SiGe HBTs by hydrodynamic device simulation p. 173
High-frequency low-noise amplifiers and low-jitter oscillators in SiGe:C BiCMOS technology p. 185
1/f noise in deep-submicron CMOS technology for RF and analog applications p. 193
Impact of the back-gate bias on the low-frequency noise of partially depleted silicon-on-insulator MOSFETs p. 208
Low-frequency noise in SiGeC-based pMOSFETs p. 215
Modeling of 1/f noise in heterostructure bipolar devices p. 226
Influence of the emitter-base junction depth on the low-frequency noise of Si/SiGeC heterojunction bipolar transistors p. 242
Low-frequency noise in 4H-SiC BJTs p. 251
InP/InGaAs/InP DHBT submitted to bias and thermal stresses : LF base noise analysis p. 255
Bias dependence of LF drain and gate noise in GaN HEMTs p. 263
1/f noise and ballistic mobility in GaN/AlGaN heterostructure field effect transistors in high magnetic fields p. 277
Low-frequency noise behavior in GaN HEMTs on silicon substrate p. 286
Using low-frequency noise characterization of AlGaN/GaN HEMT as a tool for technology assessment and failure prediction p. 296
Simulation of cyclostationary noise in semiconductor devices p. 307
Noise in Schottky-barrier diodes : from static to large-signal operation p. 322
Identification procedures for the charge-controlled nonlinear noise model of microwave electron devices p. 337
Low-frequency noise cancellation in resistive FET mixers p. 349
Phase noise in oscillators as differential-algebraic systems with colored noise sources p. 358
Semiconductor device and noise sources modeling: design methods and tools oriented to nonlinear H.F. oscillator CAD p. 373
High-frequency noise contribution to phase noise in microwave oscillators and amplifiers p. 390
Experimental results of gain fluctuations and noise in microwave low-noise cryogenic amplifiers p. 402
Thermal de-embedding procedure for cryogenic on-wafer high-frequency noise measurement p. 414
An extension to wider frequency band of a frequency and time analysis method to extract noise parameters p. 422
Simultaneous extraction of the small-signal equivalent circuit elements and noise parameters of HBTs p. 429
Noise figure reduction techniques in LNAs for wideband multistandard RF receivers p. 440
On-wafer noise source characterization p. 448
A new statistical model of nonlinear noisy oscillator p. 460
Long-term stability estimation of DC electrical source from low-frequency noise measurements p. 470
Generalized Nyquist formula and quality factor p. 480
The noise behavior of silicon JFET transistors from room temperature down to 80 K p. 486
Characterization and modeling of low-frequency noise in sub-0.1-[mu]m SiGe pMOSFETs p. 496
Coherent tools for physics-based simulation and characterization of noise in semiconductor devices oriented to nonlinear microwave circuit CAD p. 507
Monte Carlo particle-based simulation of DG MOSFETs: influence of space-quantization effects on the high-frequency noise p. 519
Cross-correlation measurements in searching for a trace of the gate voltage noise in a JFET p. 529
LF-band noise in MOSFET in low-power operation p. 538
Experimental and theoretical analysis of 1/f noise in polysilicon thin film transistors p. 549
Barrier height dependence of low-frequency noise in poly-Si thin film transistors p. 552
Direct extraction of McWhorter's constant from LFN spectra of MOSFETs with planar layers of Si nanocrystals embedded in gate SiO[subscript 2] p. 560
Noise of optoelectronic coupled devices p. 566
Impact of the scaling on the noise performance of deep-submicron Si/SiGe n-channel FETs p. 573
Phase noise in a Colpitts oscillator p. 581
