Microstructures and properties of ceramic particle-reinforced metal matrix composite layers produced by laser cladding

Influence of adding strong-carbide-formation elements multiply on particle-reinforced Fe-matrix composite layer produced by laser cladding

Surface modification of roll by pulsed Nd:YAG laser: bump formation caused by martensitic transformation

Laser refabricating of expensive parts of the equipment in oil-field on the sea

Research on laser strengthening rail steel and its wear and friction properties

Reflectivity of HgCdTe and PbS during laser annealing

Hybrid analytical-numerical solution model for laser surface processing and its application in texturing of roll surface

Laser rapid manufacturing of special pattern Inco 718 nickel-based alloy component

Laser rapid forming technology of high-performance dense metal components with complex structure

Development of CAD/CAM software used in laser direct manufacture

Direct laser deposition of Inconel 738 on directionally solidified Ni-base superalloy component

DPIV method of measurement of powder stream by co-axial feeding for laser manufacturing

Influences of powder specifications and powder delivery on laser and powder particle interaction during the LRF process

Experimental research on pulse laser forming of metal sheet

Microstructures and mechanical properties of laser rapid-formed Ti-6Al-4V alloy

Penetration monitoring and control of CO[subscript 2] laser welding with coaxial visual sensing system

Tailor-welded blanks and their production

Study on three-dimension synchrony high-speed photography of plasma during CO[subscript 2] laser welding

Laser welding of Al-Mg alloy with the thin plate

Coaxial hybrid CO[subscript 2]-MIG welding system and its application in welding of aluminum alloys

Experimental study on plasma inside the keyhole in deep penetration laser welding

Metal flow of a tailor-welded blank in deep drawing process

Hybrid Nd:YAG laser beam welding of aluminum in addition with an electric current

Effect of activating flux on plasma during CO[subscript 2] laser welding

Microstructure and toughness of HAZ of 800MPa grade RPC steel by laser welding

Three-dimension reconstruction research of plasma during laser welding

A novel absorptive thin film design for laser welding in optoelectronic device encapsulation

The influence of laser head movement on 3D cutting

Synthetic evaluation and neural-network prediction of laser cutting quality

Study of YAG laser cutting process with titanium alloy sheet
The influence investigation of laser cutting path on the resistance of chip resistors p. 253
Application of fiber laser used in the field of stent cutting and micromachining p. 263
Parameters optimization and control in precision laser scribing p. 271
Silicon microstructuring using ultrashort laser pulses p. 276
Practical applications of femtosecond laser micromachining and fabrication p. 284
Ablation mechanism of fused silica under femtosecond laser pulse p. 291
Transparent materials microprocessing by nanosecond ultraviolet laser p. 299
Measuring of the surface characteristic parameters of the polyethylene terephthalate (PET) fabric irradiated by UV laser p. 305
UV-laser-assisted processing of ceramics in air and in water p. 309
Solid state UV laser technology for electronic packaging applications p. 314
Design of optical resonator of mechanical Q-switched pulse CO[subscript 2] laser unit p. 327
Infrared femtosecond laser pulse-induced functional color centers and waveguide in alkali halide crystal p. 335
Optical model of the polyethylene terephthalate (PET) fabric irradiated by laser p. 341
Enhanced binary image by computer in laser processing p. 344
Laser-induced change of electrical resistivity of metals and its applications p. 349
Evolution of laser damage in indium antimonide(InSb) at 1.06-[mu]m wavelength p. 361
The application research of laser ultrasonic technique used in testing compound material p. 369
Wetting variation of the zirconia ceramic film by laser p. 373
The temperature effect on non-degenerating four-wave mixing in Mn:Fe:LiNbO[subscript 3] crystals p. 377
Biocompatibility enhancement of an inert ceramic using CO[subscript 2] laser radiation p. 381
Influence of the element silicon on laser processing p. 392
Effect of energy distribution of laser facula on shafting aligning detection of large assembling set p. 400
Study of laser precise drilling technology of ceramic material p. 404
Research on theodolite detecting method of artillery duplicate-aim precision p. 413
Laser surface modification with powder feeding for vertical surfaces p. 418
Deal with three-dimension image in laser processing system p. 426
Laser ultrasonic testing system using a confocal Fabry-Perot interferometer with a range stabilization module p. 430
Study on the hardened case discrepancy between the beginning and the end of laser scanning in laser transformation hardening p. 436
Laser-induced damage in the glass window at 1.064 [mu]m p. 444
Development of automatic pre-tracking system for fillet weld based on laser trigonometry p. 450
Numerical simulation of laser ultrasonics for detecting subsurface lateral defects p. 457
Surface crack detection for Al plate using the surface acoustic waves and neural network identification p. 466
Study on attenuation of laser power by powder flow in coaxial laser cladding p. 475
Numerical analysis of the temperature field in PbS detector by pulse laser irradiation  p. 483

The optoelectronic automeasuring system of wheel set comprehensive parameters  p. 491

All-solid-state laser controller design based on digital optical feedback  p. 497

Laser spot center determination with multispectrum image processing  p. 506

Finite element modeling of transient three-dimensional temperature field of workpiece with a sharp board in laser heat treatment  p. 512

Laser-induced breakdown mechanisms of a glass microsphere  p. 519

Microfabrication of optical elements with femtosecond Ti:sapphire laser oscillator  p. 526

Numerical simulation of the mechanical properties of 40Cr steel during laser quenching  p. 532

High-density optical storage and the three-dimension nesting microstructures in the side-chain azobenzene polymer system  p. 538

Study on CCD measurement of temperature field in laser molten pool  p. 546

A numerical simulation of movement powder flow and development of the carrier-gas powder feeder for laser repairing  p. 557
