Phase-shifting interferometry using an SHG blue laser diode p. 1
Super oblique incidence interferometer by using antireflection prism with subwavelength structure p. 10
Measurement of sectional profile of a thread gauge using a sinusoidally vibrating light with sinusoidal intensity p. 17
Profile measurement of objects with discontinuous surfaces by modified temporal phase unwrapping p. 23
One-dimensional surface profile measurement with a fast scanning method by detecting angular deflection of a laser beam p. 31
Quasi-phase-matched second harmonic generation in crystal quartz p. 40
Fiber optic moire interferometric profilometry p. 55
Study on the special vision sensor for detecting position error in robot precise TIG welding of some key part of rocket engine p. 66
64x1 UV focal plane array of GaN p-i-n photodiodes p. 78
Auto-focusing and auto-alignment system for three-panel LCD projection display p. 86
Research on tangent plane algorithm for spatial position of vehicle wheel p. 93
Coaxial monitoring with a CMOS camera for CO[subscript 2] laser welding p. 101
Forward cascaded stimulated Brillouin scattering (SBS) in an S-band distributed G652 fiber Raman amplifier p. 110
Interferometric displacement sensors using sinusoidal phase-modulation and optical fibers p. 120
Model of backscattering light and signal light for atmospheric range-gated imaging systems p. 128
Multilaser digital speckle pattern interferometry system p. 135
A novel displacement sensor based on diode-end-pumped solid-state laser technology p. 140
Study of the relationship between scattering-light energy characteristic of dust particles and the dust emission using a two-dimensional image sensor p. 148
Sensing with photonic crystal fibers p. 157
Research on optical fiber strain sensor based on the spiral bending p. 171
Growth and fluorescence characteristics of Cr[superscript 3+] : YAG crystal fiber for temperature sensor from -10[degrees]C to 500[degrees]C p. 177
Wide-range two-dimensional small rotation-angle measurement by use of fringe projection p. 185
Design and analysis of fluorescence fiber gratings p. 193
Analysis of the reflection of a microdrop fiber sensor p. 201
Polarization modulation in metallic nanostructures and effects of surface plasmon excitation p. 211
CCD-based system for two-dimensional measurement of color uniformity of LCD projector p. 218
An APS-based autonomous star tracker p. 225
Parallel demodulation method for EFPI and FBG sensors p. 234
The effect of sensitization time on the decay of photoelectron in AgBrl T-grain emulsion p. 243
Effect of dopants on the photorefractive effect in 0.91Pb(Zn[subscript 1/3]Nb[subscript 2/3])O[subscript 3]-0.09PbTiO[subscript 3] p. 249
A one-dimensional discrete Hilbert transform for interferometric phases p. 256
Position measurement method based on linear-array CCD with inverting prism p. 265
Direct phase modulating laser diode interferometer for in-process measurement using sinusoidal signal synchronized with the CCD camera’s exposure time p. 272

Nanostructured YSZ membranes derived from inorganic salts p. 280
Detection of pointing errors with CMOS-based camera in intersatellite optical communications p. 287
A smart temperature sensor based on the high-birefringence fiber loop mirror employing an optical-power-detection scheme p. 295
A novel FBG pressure sensor with high sensitivity p. 299
SnS films prepared by sulfuration of Sn precursor layers p. 303
Influence of deposition voltage on the quality of electrodeposited SnS film p. 308

Precision analysis of scanning element in laser scanning and imaging system p. 315
The numerical simulation of photoelectric characteristics of three-channel bulk charge-coupled device in the region of 1.0-1.26[mu]m p. 321
Position error correction of position sensitive detector by least squares support vector machine p. 326

Application of binocular vision probe on measurement of highly reflective metallic surface p. 333
The study on the spectral response of transmission-type GaAs photocathode in the seal process p. 339
High-accuracy measurement of low-water-content in liquid using NIR spectral absorption method p. 345
Method for searching the mapping relationship between space points and their image points in CCD camera p. 351
Research on photoacoustic sensing of transformer fault gases p. 356

Self-mixing laser Doppler velocimeter based on dual frequency lasers p. 363
Accurate camera intrinsic parameters calibration using virtual stereo board p. 371
A novel phase unwrapping method based on cosine function p. 383
Image drop sensor and edge analysis of the drop profile p. 393
Influence of a new surface treatment method on ohmic contact resistivity of p-type GaN p. 401

Online measuring method of the wheel set wear based on CCD and image processing p. 409
Auto-focus apparatus with digital signal processor p. 416
Ultrashort pulse measurement using interferometric autocorrelator based on two-photon-absorption detector at 1.55-[mu]m wavelength region p. 424
Investigation of sulfur-doped n-type diamond thin films p. 430

Characteristic of vapor dynamic process for sulfur-doped n-type diamond films p. 434
High-sensitivity photon-counting imaging detector p. 439
Electron transmittance characteristics of MCP ion barrier film p. 443
Image super-resolution processing approach based on genetic algorithm p. 447
Interline image revision method for electrical image stabilization p. 453
Analysis and study on the stadia of low light level imaging system p. 460

Research on intelligent detection and processing technology of laser pulse
Optimum spectral band design of the night vision system based on MRC
Mathematic modeling the relationship of bacteria number in a dairy product and the color difference measured by a CCD image sensor
Influence of the Li/Nb ratio on crystal growth and photorefractive properties of Ce: Mn: LiNbO₃ crystal
The 3D measurement system on color-encoded technique and its simulation
Influence of pinhole size and fiber optic imaging bundle on resolution in confocal endoscopic imaging system
The research of measuring method about color difference of tiles
Measuring the system gain of the TDI CCD remote sensing camera
Research on the nonuniformity correction of linear TDI CCD remote camera
CMOS APS imaging system application in star tracker
Calibration of structured light-based vision sensor with four groups of laser device and camera
Radiation calibration research on multichannel CCD camera
Design and improvement of laser tracking control system using ANN technique
A safety monitoring system for taxi based on CMOS imager
Research on application of several tracking detectors in APT system
Fast and high-accuracy spectral measurements of LED by linear CCD sensor and software calibration
EL2 deep level defects and above-band gap two-photon absorption in high-gain lateral semi-insulating GaAs photoconductive switch
A new asymmetric Fabry-Perot interferometric cavity for fiber optic sensors
Wavelength-shifting interferometry by a wide tunable laser source with a new phase-shifting technique
Wavelength-shifting phase-conjugate interferometry for distance measurements with an external-cavity laser diode
Study of tips in an ultrafast scanning tunneling microscope
A measuring technology for fiber connector end surface
