Total internal reflection noncollinear quasi-phase-matching PPLN OPO p. 206
Sub-5-fs resolved nonlinear optical processes in polydiacetylene p. 212
Interaction between subpicosecond laser and fused silica p. 224
Optical limiting behavior of 4 (2'-hydroxy-naphthyl azo) antipyrine (H-NAP) and its rare-earth complexes p. 233
Comparison of two-color holography between congruent and near-stoichiometric LiNbO[subscript 3]:Fe at low intensities p. 240
Full functional photorefractive molecule with large two-beam coupling gain p. 251
All-optical wavelength demultiplexer with photorefractive grating array p. 260
Electron-beam bunch length monitor based on electro-optic detection technique p. 269
Influences of polarization-mode dispersion on soliton transmission systems p. 275
Power scaling analyses of optical parametric amplifier p. 283
Synchronizing spatiotemporal chaos of the coupled bistable map system using nonlinear feedback p. 290
Application of optical limiting materials in laser seeker p. 297
Pedestal suppression of high-order compressed solitons by using the bistability of the nonlinear Fabry-Perot cavity p. 303
Optical properties of novel poled ferroelectric nanocrystals and polymer BaTiO[subscript 3]/PC composite films p. 311
Spectrum of dielectric barrier discharge in atmosphere p. 319
A new all-optical switch by using the nonlinear asymmetric Mach-Zehnder waveguide structure p. 325
Nonlinear all-optical phase and power-controlled switch by using the spatial soliton interaction p. 334
A new all-optical phase-controlled routing switch p. 345
The swing effect of spatial solitons excited by the butt-coupled linear waveguide p. 358
Evolution of dark spatial soliton in quasi-phase-matched quadratic media p. 369
The analysis of the threshold of concentration of damage-resistant ions by OH[superscript -] absorption spectra p. 378
Characterization of nonlinear optical properties of anthraquinone dye doped polymethyl-methacrylate (PMMA) waveguide p. 383
Dynamic properties of two-wave coupling in Ce:KNSBN crystal p. 392
All-solid-state quasi-continuous-wave tunable Ti : sapphire laser and pump-tuning PPLN-OPO p. 400
Optical bistability and differential amplification in coupled nonlinear microcavity resonators p. 404
Resonant third-order optical nonlinearities of thin films containing J-aggregates of a cyanine dye or a squarylium dye p. 411
High conversion efficiency continuous wave quasi-phase-matched second harmonic generation in MgO doped stoichiometric lithium tantalate p. 421
Investigation of stimulated Raman scattering in a phosphorus-doped silica fiber p. 427
Light pulse and spectra of conical bubbles sonoluminescence in glycol and 1,2-propanediol p. 435
A new method for generation of ultrashort light bullets in bulk dispersive Kerr medium p. 443
Study of Raman effect of ultrashort pulse in optical fiber p. 450
Refractive index changes in LiNbO$_3$ caused by compensations of lithium ions p. 458
Nonlinear absorption and refraction of neutral red dye in solid and solution forms p. 466
Third-order optical nonlinearities of several naphthalocyanines and porphyrins measured by the resonant femtosecond DFWM technique p. 471
Fabrication of high refractive index-modulation structures in fused silica by femtosecond laser pulses p. 480
Multiple micro-explosions driven by a single focused femtosecond pulse in transparent material p. 489
Development of an autocorrelator based on the organic polymer thin film p. 494
Control of second harmonic curve in a temperature-controlled periodically poled Ti:LiNbO$_3$ channel waveguide p. 503
All-optical wavelength selective channel dropping and wavelength conversion in a Ti:PPLN waveguide p. 511
The main factor of soliton-like mode creating in nonlinear photonic crystals p. 520
Mode competition in Raman fiber lasers with two different Fabry-Perot cavities p. 527
Switching behavior of NOLM-NALM mirror configurations p. 533
Influence of signal and pump wavelengths on the characteristics of ultrashort-pulse optical parametric generation p. 545
Z-scan nonlinear optical properties of the Au-SiO$_2$ nanocomposite thin film p. 555
Linewidth effect of CsLiB$_6$O$_{10}$ crystal optical parametric oscillator on pumping beam parameters p. 563
The dependence of the switching field on the intrinsic defects in lithium niobate crystals p. 568
Impulsive control of single-mode laser chaotic system p. 577
Modulation instability in distributed fiber amplifier with gain dispersion and stimulated Raman scattering p. 588
Quantitative characteristics of methane’s infrared spectra p. 593
Internal oscillations of spatial optical solitons in a cubic-quintic nonlinear medium p. 601
Controlling and synchronizing hyperchaos in degenerate optical parametric oscillator by mutual couple p. 613
The optical resonance of the optical microspherical cavity with Tm$_2$O$_3$ Tm:LiNbO$_3$ channel waveguide p. 619
Investigation on dark decay of two-color holograms in near-stoichiometric LiNbO$_3$ and LiTaO$_3$ crystals p. 623
Shift multiplexing in a compact holographic storage system by using planar waveguide referencing p. 628
The beam characteristic of Nd:YAG frequency doubling in a KTP crystal by the resonant external ring cavity p. 636
Study on SHG property of Mg: Nd: LiNbO$_3$ crystal p. 643
