Application of laser Raman spectroscopy to dental diagnosis p. 1
Fluorescence and Raman microscopy analysis of dental tissues p. 9
OCT of early dental caries : a comparative study with histology and Raman spectroscopy p. 16
PS-OCT of natural pigmented and nonpigmented interproximal caries lesions p. 25
The effect of high-index liquids on PS-OCT imaging of dental caries p. 34
Combined effect of fluoride and laser on the crystalline structure of human enamel : a pilot study p. 42
Comparison of the acid resistance of root dentin after treatment with an MIR-FEL emitting at \([\text{lambda}]=9.0 \text{ [mu]}\text{m and } [\text{lambda}]=9.7 \text{ [mu]}\text{m}\) p. 50
Increasing pulse number during CO\(_2\) laser irradiation of dental enamel extends acid dissolution time p. 59
Er:YAG laser ablation : 5-11 years prospective study p. 63
Mechanical and thermal response of enamel to IR radiation : a finite element mesoscopic model p. 69
Calculation of optical properties of dental composites as a basis for determining color impression and penetration depth of laser light p. 80
A dynamic Monte Carlo model for predicting radiant exposure distribution in dental composites : model development and verifications p. 90
Optical properties of natural caries lesions in dental enamel at 1310 nm p. 102
The effect of selective photosuppression of sensitized pathogenic microflora : Part I. Influence on pathogenic organisms causing pyoinflammatory processes in oral cavity p. 111
The effect of selective photosuppression of sensitized pathogenic microflora : Part II. Experimental validation on animals p. 120
Near-IR imaging of occlusal dental decay p. 125
Assessment of enamel chemistry composition and its relationship with caries susceptibility p. 132
Cervical microleakage in root canals treated with Er:YAG and Nd:YAG laser p. 140
The influence of surface roughness on the bond strength of composite to dental hard tissues after Er:YAG laser irradiation p. 144
The influence of pulse duration on the bond strength of dentin to composite after Er:YAG laser irradiation p. 151
Fourier-transform Raman spectroscopy study of human dentin irradiated with Er:YAG laser p. 157
Autofluorescence of healthy and inflamed pulpal tissues : photodynamic diagnosis of pulpal tissue p. 163
Data analysis in Raman measurements of biological tissues using wavelet techniques p. 170
Morphological analysis of cavities prepared by different parameters of Er:YAG laser p. 179
Tensile bond strength of different adhesive systems to primary dentin treated by Er:YAG laser and conventional high-speed drill p. 190
