IFSAR processing for 3D target reconstruction  p. 1
Microlocal analysis of GTD-based SAR models  p. 15
Extended adaptive filtering for wide-angle SAR image formation  p. 24
SAR imaging from partial-aperture data with frequency-band omissions  p. 32
3-D SAR image formation from sparse aperture data using 3-D target grids  p. 44
Mitigation of complex target Doppler aliasing artifacts in SAR imagery using stepped-frequency waveforms  p. 54
Backhoe 3D "gold standard" image  p. 64
Target surface finding using 3D SAR data  p. 72
Three-dimensional target visualization from wide-angle IFSAR data  p. 76
An iterative method for SAR moving target detection and geolocation for staring radar applications  p. 86
Scanned time/angle correlation: a new method for super-resolution  p. 95
Multi-baseline IFSAR study using an SBR based simulator  p. 102
A parallel real-time computing-cluster implementation of spotlight SAR processing  p. 112
Regularization based super resolution imaging using FFT:s  p. 122
Doppler-only imaging of stationary targets  p. 132
Imaging that exploits multipath scattering from point scatterers  p. 142
Ground moving target detection and tracking based on generalized SAR processing and change detection  p. 156
Adaptive noise radar for simultaneous bistatic SAR and GMTI  p. 166
Suppression of radio frequency interference (RFI) for synchronous impulse reconstruction ultra-wideband radar  p. 178
Exploiting the intensity and phase characteristics of airborne SAR data over urban areas  p. 185
Experiments on wideband through-the-wall radar imaging  p. 196
Speckle reduction of SAR images using a physically based Markov random field model and simulated annealing  p. 210
Signal subspace change detection in averaged multi-look SAR imagery  p. 222
Change detection for multi-polarization multi-pass SAR  p. 234
Kernel-machine-based classification in multi-polarimetric SAR data  p. 247
Random subspaces and SAR classification efficacy  p. 257
SAR ATR using genetics based machine learning  p. 269
Synthetic aperture radar automatic target recognition using adaptive boosting  p. 282
Adaptive SAR ATR in likelihood space  p. 294
Classification of sequenced SAR target images via hidden Markov models with decision fusion  p. 306
Comparative analysis of feature extraction (2D FFT and wavelet) and classification (L[subscript p] metric distances, MLP NN, and HNeT) algorithms for SAR imagery  p. 314
Impact of SAR image quality on recognition  p. 326
Machine learning in exploitation  p. 337
An approach to automated registration evaluation  p. 345
Detection system performance metrics with scene content dependencies  p. 354
