Twenty years history and the future of Asian-Pacific Association of Laser Medicine and Surgery (APLMS)
The development of laser surgery and medicine in China
22 years of photodynamic therapy in China
CO\textsubscript{2} laser, my number one popular laser
Chinese advances in the research of photobiomodulation and its therapeutic applications
Mechanisms of tumor destruction caused by photodynamic therapy
Lasers in the skin cosmetic : problems and solutions
Development of highly advanced soft x-ray lasers for biomedical and nano-laser medicine applications
Experimental and clinical studies on transmyocardial laser revascularization
Steady-state and time-resolved fluorescence spectra for detection of colonic cancer
Auto-simultaneous laser treatment and Ohshiro's classification of laser treatment
The evaluation of retinal circulation in advanced diabetic retinopathy before and after panretinal laser photocoagulation by scanning laser opthalmoscope
Present status of endoscopic surgery in Japan : laparoscopic surgery and laparoscopic assisted surgery for gastric cancer
Development of a handy-type laser surgical unit
The clinical application of Ho:YAG laser
Determination of the ablation threshold of 1341nm Nd:YAP laser radiation in the larynx of rabbit
Microdegree polarimetry for glucose concentrations detection
Laser assisted internal mammary artery-coronary artery anastomosis : an experimental study
The force on the surface of erythrocyte under laser irradiation
Experimental study of biological effect on canine stomach in vitro by Nd:YAP laser
Experimental study of biological effects on canine bronchia by Nd:YAP laser
Expression of Fas protein on CD\textsuperscript{4}+T cells irradiated by low level He-Ne laser in the cases of psoriasis
Experimental study of biological effect by Nd:YAP laser (1.34\mu m)
Transmyocardial revascularization on canine with Ho:YAG laser : an experimental study
Biological effects on canine uterus by Nd:YAP laser : an experimental study
Experimental study on apoptosis induced by semiconductor laser to hair removal and armpit odor treatment
Biological effects on canine bladder by Nd:YAP laser : an experimental study
The influence of 630nm semiconductor laser irradiation on rat S180 ascitic tumor cells without photosensitizers
A short-term follow-up study of photodynamic therapy on 23 cases of malignant tumors
Basic research in PDT
The photosensitizer talaporfinum caused microvascular embolization for photodynamic therapy

Model for monitoring the process of photodynamic therapy in patients

Diagnosing lung cancer by using fluorescence induced from small dose of hematoporphurin

Photodynamic therapy on the ultrastructure of glioma cell

Research of ALA combined with HpD-PDT which induced S180 ascitic tumor cells, death or apoptosis on cytology

Photodynamic therapy of urethral condylomata acuminata using topically 5-aminolevulinic acid

Photodynamic therapy for implanted VX2 tumor in rabbit brains

Metabolization of ALA taken orally and its effect on skin and tumors

The metabolic comparison of HPD in normal brain tissue and S180 sarcoma in brain

Metabolism of oral ALA combined small dose HPD in the small rat glioma

Photodynamic therapy of malignancy of skin with He-Ne laser

Analysis of related factor of pigment alteration after Q-switched laser treatment

Experimental study on port-wine stain treated by small dose HpD and variable pulsed 532nm laser

The effectiveness of treatment of xanthelasma palpebrarum with ultrapulsed CO\text{[subscript 2]} laser

Treatment of condylomata acuminata with Ho:YAG laser

The clinical application of laser in otorhinolaryngology

Treatment for intranasal synechiae by CO\text{[subscript 2]} laser under endoscopic visualization

Advances in endonasal low intensity laser irradiation therapy

Influence of intravascular low level He-Ne laser irradiation on iNOS, total-NOS, and ET-1 in acute spinal cord-injured rabbits

The neuroprotective effects of intravascular low level laser irradiation on cerebral ischemia rats

The intravascular low level laser irradiation (ILLLI) in treatment of psoriasis clinically

The relativity between cytokines and psoriasis and the influence on its variation induced by ILLLI

The effect of ILLLI on peripheral blood SOD, MDA in psoriasis treatment

The effects of ILLLI on peripheral blood T lymphocytes subpopulation and NK cells in psoriasis treatment

Research of epidermal cellular vegetal cycle of intravascular low level laser irradiation in treatment of psoriasis

Effect of intravascular irradiation of He-Ne laser on cerebral infarction: hemorrhoeology and apoptosis

Prophylactic use of timolol maleate to prevent intraocular pressure elevation after Nd-YAG laser posterior capsulotomy

Early panretinal photocoagulation for the treatment of ischemic central retinal vein occlusion

Laser application in the field of vascular anastomosis: experimental and clinical study
Laser angioplasty for cardiovascular disease
Using transurethral Ho:YAG-laser resection to treat urethral stricture and bladder neck contracture
Frequency-doubled dual-pulse FREDDY lithrotripsy laser in the treatment of urinary tract calculi
Ho:YAG laser application in cerebellopontine angle tumor operation
Rethinking of photodynamic therapy on cerebral glioma: the difficulty of necrotic tissue exclusion and its sequence
Treatment of lumbar disc herniation by percutaneous laser disc decompression (PLDD) and modified PLDD
Analysis on the effect of urethra caruncle treated by Ho:YAG laser
The analysis on effect of oral mucoid cyst treated by Ho:YAG laser
Ureteropyeloscopy and hoimium:YAG laser lithotripsy for treatment of ureteral calculi (report of 356 cases)
Improvement of the technique in treatment of internal hemorrhoids with Nd:YAG laser

The clinical study of percutaneous disc decompression of treating herniation of cervical disc with Nd:YAG laser
