Optical design considerations for high-concentration photovoltaics
Progress in the development of modular reflective concentrators for large-scale deployment
Performance and reliability of a 30-kW triple-junction photovoltaic receiver for 500X concentrator dish or central receiver applications
Modeling of multi-junction solar cells by crosslight APSYS
Probing concentrator solar cell performance at high flux with localized irradiation
Second-generation PVCC design with a dielectric light injector and polyhedron interior cavity
p-n junction heterostructure device physics model of a four Junction solar cell
Optical control of sunlight concentrators
Design and modeling of a measuring device for a TIR-R concentrator
