Blocked force and free displacement characterization of PMN-32%PT stacks

Creeping polarization and remanent strain in ferroelectrics under uniaxial electromechanical loading

Microstructural modeling of ferroic switching and phase transitions in PZT

Analytical model for the strain-field and polarization-field hysteresis curves for ferroic materials

Dynamic thermo-electro-mechanical performance of piezoelectric stack actuators

Vector potential formulation for the three-dimensional finite element analysis of nonlinear electromechanical problems

Domain wall pinning by point defects in ferroelectric materials

A thermodynamic consistent material model for hysteresis effects in ferroelectric ceramics and its finite element implementation

Evolution of elastic, dielectric, and piezoelectric coefficients of PZT under electromechanical loading

Tensile and compressive stress dependency of the transverse (e31,f) piezoelectric coefficient of PZT thin films for MEMS devices

Coupled finite element modeling of piezothermoelastic materials

Studies on ferroelastic time-dependent domain-switching effects of PZT ceramics

Study about possibilities for direct integration of piezo-fibers in sheet metal

Studying the effects of temperature on energy harvesting using pre-stressed piezoelectric diaphragms

Energy conversion in piezoelectric superlattices

Switching characteristics of (Bi1/2Na1/2)TiO3-BaTiO3-(Bi1/2K1/2)TiO3 lead-free ferroelectric ceramics

Nonlinear electric reaction arising in dry bone subjected to 4-point bending

An experimental study to improve the performance of unimorph piezoelectric actuators subjected to external loading

Life-span investigations of piezoceramic patch sensors and actuators

Poly(vinylidene fluoride)/zinc oxide smart composite material

An investigation on granular-nanocomposite-based giant magnetoresistance (GMR) sensor fabrication

A generalized energy model for the behavior of single-crystal magneto-electric composites

Improving rotational isomeric state theory for application to mechanical properties prediction

Evaluating the mechanical integrity of bilayer lipid membranes using a high-precision pressurization system

Design of active composites

Thermomechanical indentation of shape memory polymers

Bill Armstrong memorial session: elastic modulus and strain recovery testing of variable stiffness composites for structural reconfiguration applications

Bill Armstrong memorial symposium: free energy model for magnetization and magnetostriction in stressed Galfenol alloys

Efficient inverse compensation for hysteresis via homogenized energy models

Active repair of self-healing polymers with shape memory alloy wires
Computational design and optimization of a biomimetic self-healing/cooling composite material
On a path toward structures with reconfigurable circulatory systems
Self-healing polymers and composites based on thermal activation
Novel processes to reinforce the piezoelectric actuator interface with carbon nanotubes
Modeling of piezo-SMA composites for thermal energy harvester
Experimental development of power consumption in LIPCA-C2
Piezoresistance property of cement-based composites filled with carbon black and the application of it for strain sensing
Electroactivity of polymeric suspensions
Microwave absorbing properties of ferrite-based nanocomposites
Hingeless CFRP structure by using partially flexible composites
Thermal effects investigation of microcantilevers actuated by boron-nitride nanotubes
Three-dimensional multifunctional hierarchical nanocomposites : multifunctional materials
Self-sensing and self-actuation response of carbon nanotube composites
Multifunctional composites with self-sensing capabilities : carbon nanotube-based networks
Integration of electrical conductivity and high strength in a SWNT polymeric nanocomposite
Performance and characteristics of functionalized multiwalled carbon nanotubes/cellulose EAPap actuator
Axially compressed buckling of an embedded boron nitride nanotube subjected to thermo-electro-mechanical loadings
Alignment of multiwalled carbon nanotubes in cellulose EAPap by electric fields
A continuum thermodynamics formulation for micro-magneto-mechanics with applications to ferromagnetic shape memory alloys
Magnetomechanical characterization and untried actuator/sensor modeling of ferromagnetic shape memory alloy Ni-Mn-Ga
Multiscale theory of thin film magnetic shape memory alloy microactuators
Correlation between mechanical behavior and actuator-type performance of Ni-Ti-Pd high-temperature shape memory alloys
Thermomechanical characterization of a TiPdNi high temperature SMA under tension
A cyclic model for superelastic shape memory alloys
Relation between martensite volume fraction and equivalent transformation strain in an anisotropic CuAlBe shape memory alloy
Producing and quantifying induced uniaxial anisotropy in stress annealed polycrystalline Galfenol
Magnetostrictive bending micro-actuator using iron-gallium alloy
Magneto-mechanical model of sensor-actuator in bending mode
Open loop nonlinear optimal tracking control of a magnetostrictive terfenol-D actuator
Effect of soft magnetic materials blend on the properties of polymer-bonded Terfenol-D composites
Deformation behavior of polycrystalline Galfenol at elevated temperatures
Fatigue of cracked PZT ceramics in three-point bending under electric fields
Derivation and simulation of an improved two-dimensional constitutive law for shape memory alloys
Synthesis and characterization of low cost magnetorheological (MR) fluids
Resin flow monitoring in vacuum assisted resin transfer molding using optical fiber distributed sensor
A combined NDE/FEA approach to evaluate the structural response of a metal foam
Investigation of mechanical and conductive properties of shape memory polymer composite (SMPC)
Influence of cross-linking degree on shape memory effect of styrene copolymer
New high-performance piezoelectric actuator
A study on mechanical properties of nation fabricated by hot-pressing method
Symposium plenary presentation: revolutionary transitions of GE technology in NDE prognostics and health monitoring
