Two-micron thulium-pumped-holmium laser source for DIRCM applications
Evolution of a solid state laser
The reflective properties of a volume Bragg grating exposed to a high power laser beam

A silicon carbide face cooled ceramic Nd:YAG laser
AFB CVD diamond composites with laser materials
Progress in ceramic Nd:YAG laser
Domestically produced ceramic YAG laser gain material for high power SSLs
Line tunable visible and ultraviolet laser
Innovative high-power CW Yb:YAG cryogenic laser
Compact laser sources for laser designation, ranging and active imaging
Eyesafe diffraction-limited single-frequency 1 ns pulsewidth Er:YAG laser transmitter
Experimental and modeling study of Er:YAG kinetics
Latest developments in resonantly diode-pumped Er:YAG lasers
Scalable ultra-low quantum defect Er lasers
Ultra-low photon defect diode-pumped cryo-cooled Er:YAG laser
522 W spectrally beam combined fiber laser with near-diffraction limited beam quality

High peak power Yb-doped diode pumped fiber amplifier system
A novel side coupling technique for rugged all-fiber lasers and amplifiers
High peak power eye-safe coherent EYDFA laser source
Room-temperature, near IR fluorescence of high optical quality KTP
Architectural issues and designs in creating high energy fiber lasers
Walk-off correction with AFB nonlinear composites
Recent progress in transition metal doped II-VI mid-IR lasers
Raman scattering spectroscopy for explosives identification
High-power single-frequency tunable CW Er-fiber laser pumped Cr superscript 2+ :ZnSe laser
Fiber-coupled laser systems for high-power and high-brightness applications
High brightness semiconductor lasers from 780-1064 nm
High brightness semiconductor lasers at 1300-1600-nm
Recent developments in high power 2.3-2.4 [mu]m diode lasers
Room temperature high power mid-IR diode laser bars for atmospheric sensing applications
Time-dependent model of eye-safe erbium-doped YAG laser
Thermal lensing in high power solar pumped solid state lasers
The progress towards the transparent ceramics fabrication
Fast-tuning narrow-linewidth all polarization-maintaining fiber ring laser
Spectroscopic characterization of ceramic laser materials for high-performance solid-state lasers
A CTE matched, hard solder, passively cooled laser diode package combined with nXLT facet passivation enables high power, high reliability operation
