Origins of randomness in statistical and quantum mechanics

Thermal noise informatics: totally secure communication via a wire, zero-power communication, and thermal noise driven computing

Stationary and nonstationary noise in superconducting quantum devices

Shot noise in transport through quantum dots: ballistic versus diffractive scattering

A deterministic solver for the Langevin Boltzmann equation including the Pauli principle

Adiabatic ac-drive as a tool for acceleration of diffusion in spatially periodic structures and of reset process in threshold devices

Numerical investigation of noise and transport properties of multiple mesoscopic cavities

Assessing the 1/f noise contributions of accidental defects in advanced semiconductor devices

Resistive switching and noise in non-volatile organic memories

On the mechanisms of low-frequency noise in vertical silicon pnp BJTs

Low-frequency noise characterizations of GaN-based visible-blind UV detectors fabricated using a double buffer layer structure

A semiconductor device noise model: integration of Poisson type stochastic Ohmic contact conditions with semiclassical transport

On the origin of 1/f noise in MOSFETs

Low-frequency noise and random telegraph signal noise in SiGe: C heterojunction bipolar transistors: impact of carbon concentration

1/f noise in SiGe HBTs fabricated on CMOS-compatible thin-film SOI

Current and optical low-frequency noise of GaInN/GaN green light emitting diodes

Impact of BOX/substrate interface on low frequency noise in FD-SOI devices

A very low noise voltage reference for high sensitivity noise measurements

Noise characteristic and quality investigation of ultrafast avalanche photodiodes

Very long decay time for electron velocity distribution in semiconductors and consequent 1/f noise

Polarization fluctuations in an epoxy system above and below the glass transition

Numerical simulations of low-frequency noise in RuO[subscript 2]-glass films

Shot-noise of quantum chaotic systems in the classical limit

The noise susceptibility of a coherent conductor

Non-Gaussian noise in quantum wells

Fluctuation-enhanced sensing

Noise optimization of an active pixel sensor for real-time digital x-ray fluoroscopy

Utilising Jitter noise in the precise synchronisation of laser pulses

Vibration-induced conductivity fluctuation measurement for soil bulk density analysis

SNDR enhancement in noisy sinusoidal signals by non-linear processing elements

Four channels cross correlation method for high sensitivity current noise measurements
Noise properties of high-$T_c$ superconducting transition edge bolometers with electrothermal feedback
Mechanical-thermal noise characterization of a new micromachined acoustic sensor
Signal recovery from mixed coherent signal and noise
Usage of microplasma signal noise for solar cells diagnostic
Impact of self-hearing in LF noise measurements with voltage amplifiers
Imaging spatio-temporal fluctuations and local susceptibility in disordered polymers
Noise and hysteresis in charged stripe, checkerboard, and clump forming systems
Noise evidence for intermittent channeled vortex motion in laser-processed YBaCuO thin films
Fluctuation-induced first order transition due to Griffiths anomalies of the cluster glass phase
Numerical modeling of electron noise in nanoscale Si devices
Microscopic modeling of impact-ionization noise in SiGe heterojunction bipolar transistors
Noise characteristics and reliability of light emitting diodes based on nitrides
Theoretical aspects of nonlinear thermal fluctuations
Generation-recombination noise in forward-biased 4H-SiC p-n diode
Main sources of electron mobility fluctuations in semiconductors
Noises of p-i-n UV photodetectors
Noise spectroscopy of new silicon solar cells with double-sided texture
Low frequency gate noise modeling of ultrathin oxide MOSFETs
Challenges in HF noise characterization and modeling of sub-100nm MOSFETs for RF ICs
Characterization and model enablement of high-frequency noise in 90-nm CMOS technology
Performance limits of simulation models for noise characterization of mm-wave devices
Correlation technique to reach ultimate resolution in noise measurements
Application of physical models to circuit simulations
Measurements to reveal phase-noise producing mechanisms in resonator-oscillators
Digital switching noise as a stochastic process
Effects of circuit elements and harmonic oscillation power on fundamental PM noise power of FET oscillator
Does measurement noise increase as a phase transition is approached?
Low-temperature resistance noise in lightly doped La$_{2-x}$Sr$_x$CuO$_{4}$ thin films
Electronic noise in silicon nitride ceramics doped by carbon allotropes
Noise in superconducting MgB$_2$ thin film
