Sensing and Imaging

Post-capture data analysis as an aid to the interpretation of ultraviolet-induced fluorescence images

Deep shadows in a shallow box

Enhancement of overwritten text in the Archimedes Palimpsest

Color and Multispectral

Multispectral processing of combined visible and x-ray fluorescence imagery in the Archimedes palimpsest

Color transplant for reverse ageing of faded artworks

An investigation of multispectral imaging for the mapping of pigments in paintings

Colour cluster analysis for pigment identification

Image analysis of Renaissance copperplate prints

Stroke and Mark Analysis

Drawing tool recognition by stroke ending analysis

Estimating the original drawing trace of painted strokes

Recovering layers of brush strokes through statistical analysis of color and shape: an application to van Gogh’s Self Portrait with Grey Felt Hat

Texture, Pattern, and Three-Dimensional Analysis

Multifractal analysis and authentication of Jackson Pollock paintings

Reflections on praxis and facture in a devotional portrait diptych: a computer analysis of the mirror in Hans Memling’s Virgin and Child and Maarten van Nieuwenhove

Aberration analysis of the putative projector for Lorenzo Lotto’s Husband and Wife: image analysis through computer ray-tracing

Inferring illumination direction estimated from disparate sources in paintings: an investigation into Jan Vermeer’s Girl with a Pearl Earring

Image analysis of paintings by computer graphics synthesis: an investigation of the illumination in Georges de la Tour’s Christ in the Carpenter’s Studio

Interactive Paper Session

Global nonlinear compression of natural luminances in painted art
