Reviews and Dosimetry

The role of nitric oxide in low level light therapy
A 3D dose model for low level laser/led therapy biostimulation and bioinhibition
How phototherapy affects the immune system
The irradiation parameters investigation of photodynamic therapy on yeast cells

In Vitro

Laser light induced modulations in metabolic activities in human brain cancer
Methylene blue aggregation in the presence of human saliva
Influence of the fractioned irradiation energy in the phototherapy with low intensity laser on the growth of human dental pulp fibroblasts

In Vivo

Angiogenesis induced by low-intensity laser therapy: comparative study between single and fractioned dose on burn healing
Analgesic effect of simultaneous exposure to infrared laser radiation and [mu]T magnetic field in rats
Photosensitization of Aggregatibacter actinomycesfemcomitans with methylene blue: a microbiological and spectroscopic study
Antimicrobial comparison on effectiveness of endodontic therapy and endodontic therapy combined with photo-disinfection on patients with periapical lesion: a 6 month follow-up

Clinical

Optical coherence tomography imaging for evaluating the photo biomodulation effects on tissue regeneration in the oral cavity
The oral cavity as a guide for the application of low level laser energy and its direct effect on the autonomic nervous system providing true energy healing for all health practitioners
Treating cerebral palsy with aculaser therapy
