

Sylvester-Gallai problem: The beginnings of combinatorial geometry

Arrangements of surfaces: Evolution of the basic theory

Davenport-Schinzel sequences: The inverse

Ackermann function in geometry Incidences and their relatives

From Szemerédi and Trotter to cutting lenses

Crossing numbers of graphs: Graph drawing and its applications

Extremal combinatorics: Repeated patterns and pattern recognition

Lines in space: From ray shooting to geometric transversals

Geometric coloring problems: Sphere packings and frequency allocation

From Sam Loyd and Laszlo Fejes Toth: The 15 puzzle and motion planning
