Allelopathy: Current Status and Future Goals
Lichen Allelopathy: A Review
Overcoming Alleopathic Growth Inhibition by Micorrhizal Inoculation
Allelopathic, Herbaceous, Vascular Hydrophytes
Identification of Allelochemicals in Eucalyptus citriodora and Polygonum sachalinense
Quercetin and Quercitrin from Pluchea lanceolata and Their Effect on Growth of Asparagus Bean
Mechanism of Action of Allelochemicals in Allelopathy
Allelopathic Properties of Alkaloids and Other Natural Products: Possible Modes of Action
The Value of Model Plant-Microbe-Soil Systems for Understanding Processes Associated with Allelopathic Interaction: One Example
Characterization of the Mechanisms of Allelopathy: Modeling and Experimental Approaches
Plant Stress and Allelopathy
Chemical Communication Between the Parasitic Weed Striga and Its Crop Host: A New Dimension in Allelochemistry
Allelopathy and Self-Defense in Barley
Tillage and Allelopathic Aspects of the CornSoybean Rotation Effect
Intercropping Allelopathic Crops with Nitrogen-Fixing Legume Crops: A Tripartite Legume Symbiosis Perspective
Allelopathy and Sustainable Agriculture
Allelopathy in Mexican Plants: More Recent Studies
Allelopathic Activity of Naturally Occurring Compounds from Mung Beans (Vigna radiata) and Their Surrounding Soil
Potential of Hydroxamic Acids in the Control of Cereal Pests, Diseases, and Weeds

Fungal Antibiosis and Biocontrol of Plant Disease
Weed Control with Mycoherbicides and Phytotoxins: A Nontraditional Application of Allelopathy
Biological Control of Plant Pathogens by Antibiotic-Producing Bacteria
Allelopathy in the Search for Natural Herbicide Models
Role of Secondary Metabolites in Root Disease Suppression
Natural Products with Potential Use as Herbicides
