Molecular Markers and Environmental Organic Geochemistry: An Overview

Contemporary Biogenic Markers

Signature Lipid Biomarker Analysis for Quantitative Assessment In Situ of Environmental Microbial Ecology

Diether and Tetraether Phospholipids and Glycolipids as Molecular Markers for Archaeabacteria (Archaea)

Seasonal Variation in Sedimentary Microbial Community Structure as a Backdrop for the Detection of Anthropogenic Stress

The Use of Aromatic Acids and Phospholipid-Ester-Linked Fatty Acids for Delineation of Processes Affecting an Aquifer Contaminated with JP-4 Fuel

Application of Chlorophyll and Carotenoid Pigments for the Chemotaxonomic Assessment of Seston, Periphyton, and Cyanobacterial Mats of Lake Okeechobee, Florida

Higher Molecular Weight Terpenoids as Indicators of Organic Emissions from Terrestrial Vegetation

Fossil Biomarkers

Applications of Biomarkers for Identifying Sources of Natural and Pollutant Hydrocarbons in Aquatic Environments

Biogeochemical Marker Profiles in Cores of Dated Sediments from Large North American Lakes

An Application of Biomarkers in a Preliminary Environmental Study of the Lower Daintree River, North Queensland, Australia

Preliminary Study of Organic Pollutants in Air of Guangzhou, Hong Kong, and Macao

Anthropogenic Markers

Anthropogenic Molecular Markers: Tools To Identify the Sources and Transport Pathways of Pollutants

Alkylbenzenesulfonates in Recent Lake Sediments as Molecular Markers for the Environmental Behavior of Detergent-Derived Chemicals

Linear Alkylbenzenesulfonates and Polychlorinated Biphenyls as Indicators of Accumulation, Biodegradation, and Transport Processes in Sewage Farm Soils

Fluorescent Whitening Agents as Molecular Markers for Domestic Wastewater in Recent Sediments of Greifensee, Switzerland

Interpretations of Contaminant Sources to San Pedro Shelf Sediments Using Molecular Markers and Principal Component Analysis

Use of Trialkylamines as a Marker of Sewage Addition into the Marine Environment

Aliphatic Hydrocarbons, Linear Alkylbenzenes, and Highly Branched Isoprenoids in Molluscs of the Adriatic Sea, Italy

2-(4-Morpholinyl)benzothiazole as an Indicator of Tire-Wear Particles and Road Dust in the Urban Environment

Detecting and Distinguishing Sources of Sewage Pollution in Australian Inland and Coastal Waters and Sediments
