Opportunities and challenges in wireless sensor networks
Next-generation technologies to enable sensor networks
Sensor network management
Models for programmability in sensor networks
Miniaturizing sensor networks with MEMS
A taxonomy of routing techniques in wireless sensor networks
Artificial perceptual systems
Sensor network architecture and applications
A practical perspective on wireless sensor networks
Introduction to industrial sensor networking
A sensor network for biological data acquisition
Sensor network architecture
Tiered architectures in sensor networks
Power-efficient topologies for wireless sensor networks
Architecture and modeling of dynamic wireless sensor networks
Overview of communication protocols for sensor networks
Communication architecture and programming abstractions for real-time embedded sensor networks
A comparative study of energy-efficient (E\textsuperscript{2}) protocols for wireless sensor networks
Coverage in wireless sensor networks
Location management in wireless sensor networks
Positioning and location tracking in wireless sensor networks
Tracking techniques in air vehicle-based decentralized sensor networks
Fundamental protocols to gather information in wireless sensor networks
Comparison of data processing techniques in sensor networks
Computational and networking problems in distributed sensor networks
Cooperative computing in sensor networks
Dynamic power management in sensor networks
Design challenges in energy-efficient medium access control for wireless sensor networks
Techniques to reduce communication and computation energy in wireless sensor networks
Energy-aware routing and data funneling in sensor networks
Security and privacy protection in wireless sensor networks
A taxonomy for denial-of-service attacks in wireless sensor networks
Reliability support in sensor networks
Reliable energy-constrained routing in sensor networks
Fault-tolerant interval estimation in sensor networks
Fault tolerance in wireless sensor networks
Low-power design for smart dust networks
Energy-efficient design of distributed sensor networks
Wireless sensor networks and computational geometry
Localized algorithms for sensor networks
