Designing a Descriptive Procedure p. 174
Terminology p. 174
Intensity p. 175
Other Options p. 175
Modified Short-Version Spectrum Descriptive Procedures for Quality Assurance, Shelf-Life Studies, etc. p. 175
References p. 176
Spectrum Terminology for Descriptive Analysis p. 177
Terms Used to Describe Appearance p. 177
Terms Used to Describe Flavor (General and Baked Goods) p. 178
Example: Flavor Terminology of Baked Goods p. 178
Terms Used to Describe Semisolid Oral Texture p. 180
Example: Semisolid Texture Terminology -- Oral Texture of Peanut Butter p. 181
Terms Used to Describe Solid Oral Texture p. 182
Example: Solid Texture Terminology of Oral Texture of Cookies p. 183
Terms Used to Describe Skinfeel of Lotions and Creams p. 184
Terms Used to Describe Handfeel of Fabric and Paper p. 185
Terms Used to Describe the Feel of Hair (Wet and Dry) p. 187
Terms Used to Describe the Lather and Skinfeel of Bar Soap p. 190
Terms Used to Describe the Skinfeel of Antiperspirants p. 192
Spectrum Intensity Scales for Descriptive Analysis p. 195
Intensity Scale Values (0 to 15) for Some Common Aromatics p. 195
Intensity Scale Values (0 to 15) for the Four Basic Tastes p. 196
Intensity Scale Values (0 to 15) for Semisolid Oral Texture Attributes p. 198
Intensity Scale Values (0 to 15) for Solid Oral Texture Attributes p. 199
Intensity Scale Values (0 to 15) for Skinfeel Texture Attributes p. 204
Intensity Scale Values (0 to 15) for Fabricfeel Attributes p. 206
Spectrum Descriptive Analysis Product Lexicons p. 209
Spectrum Descriptive Analysis Full Product Descriptions p. 216
White Bread p. 216
Toothpaste p. 217
Peanut Butter p. 218
Mayonnaise p. 219
Marinara Sauce p. 220
Spectrum Descriptive Analysis Training Exercises p. 222
Basic Taste Combinations Exercise p. 222
Cookie Variation Exercise p. 225
Effective Tests: Consumer Tests and In-House Panel Acceptance Tests p. 231
Purpose and Applications p. 232
Product Maintenance p. 233
Product Improvement/Optimization p. 233
Development of New Products p. 234
Assessment of Market Potential  p. 234
Category Review  p. 234
Support for Advertising Claims  p. 235
The Subjects/Consumers in Affective Tests  p. 235
Sampling and Demographics  p. 235
Source of Test Subjects: Employees, Local Residents, the General Population  p. 236
Choice of Test Location  p. 237
Laboratory Test  p. 238
Central Location Tests  p. 238
Home Use Tests  p. 239
Affective Methods: Qualitative  p. 239
Applications  p. 239
Types of Qualitative Affective Tests  p. 240
Focus Groups  p. 240
Focus Panels  p. 240
One-on-One Interviews  p. 240
Affective Methods: Quantitative  p. 241
Applications  p. 241
Types of Quantitative Affective Tests  p. 241
Preference Tests  p. 241
Acceptance Tests  p. 242
Assessment of Individual Attributes (Attribute Diagnostics)  p. 245
Design of Quantitative Affective Tests  p. 247
Questionnaire Design  p. 247
Protocol Design  p. 248
Using Other Sensory Methods to Supplement Affective Testing  p. 249
Relating Affective and Descriptive Data  p. 249
Using Affective Data to Define Shelf-Life or Quality Limits  p. 251
Example 12.3: Shelf Life of Sesame Cracker  p. 251
References  p. 254
Questionnaire for Consumer Studies  p. 255
Candy Bar Questionnaire  p. 255
Candy Bar Liking Questions  p. 255
Candy Bar Specific Evaluation  p. 256
Paper Table Napkins Questionnaire  p. 258
Paper Table Napkins Liking Questions  p. 258
Paper Table Napkins Specific Evaluation  p. 259
Protocol Design for Consumer Studies  p. 260
Protocol Design Format Worksheets  p. 260
Product Screening  p. 260
Sample Information  p. 260
