

Basic Concepts	
Outline of Part I	p. 3
Background Discussion	
Preliminary Remarks	p. 5
Euler and Lagrange Formulations	p. 5
The Stress Tensor	p. 16
Relation between Stress and Deformation-Rate Tensors	p. 19
Constitutive Relations	p. 22
Integral Relations	p. 25
References	p. 29
Problems	p. 29
The Conservation Equations	
Preliminary Remarks	p. 33
Mass Equation	p. 33
Transport Theorem	p. 34
Linear Momentum Equation	p. 35
Inertial Frame	p. 36
Angular Momentum Equation	p. 39
Energy Equation	p. 41
Viscous Dissipation	p. 44
Alternate Forms for the Energy Equation	p. 46
Reference	p. 48
Problems	p. 49
Classical Thermodynamics	
Preliminary Remarks	p. 53
Combined First and Second Laws	p. 53
Potential Functions	p. 56
Open System	p. 58
Coupling to Fluid Dynamics	p. 63
Compressible Liquid or Solid	p. 73
Second Law	p. 75
References	p. 83
Problems	p. 84
Kinematics	
Preliminary Remarks	p. 89
Definitions	p. 89
Kelvin's Equation and Vorticity	p. 94
Helmholtz Vortex Theorems	p. 97
Reference	p. 100
Problems	p. 100
Advanced Gas Dynamics	

Outline of Part II	p. 105
Euler Equations	
Preliminary Remarks	p. 107
Equations--Initial and Boundary Conditions	p. 107
Bernoulli's Equations	p. 110
Vorticity	p. 114
Steady Flow	p. 118
Two-Dimensional or Axisymmetric Flow	p. 120
Natural Coordinates	p. 129
References	p. 134
Problems	p. 135
Shock Wave Dynamics	
Preliminary Remarks	p. 143
Jump Conditions	p. 144
Steady, Two-Dimensional or Axisymmetric Flow	p. 155
Coordinate Transformation	p. 165
Tangential Derivatives	p. 175
Normal Derivatives	p. 180
References	p. 184
Problems	p. 184
The Hodograph Transformation and Limit Lines	
Preliminary Remarks	p. 191
Two-Dimensional, Irrotational Flow	p. 192
Ringleb's Solution	p. 202
Limit Lines	p. 213
General Solution	p. 214
Rotational Flow	p. 223
References	p. 228
Problems	p. 229
The Substitution Principle	
Preliminary Remarks	p. 233
Transformation Equations	p. 233
Parallel Flow	p. 241
Prandtl-Meyer Flow	p. 243
Rotational Solutions in the Hodograph Plane	p. 249
References	p. 252
Problems	p. 252
Calorically Imperfect Flows	
Preliminary Remarks	p. 257
Thermodynamics	p. 258
Isentropic Streamtube Flow	p. 261

Planar Shock Flow	p. 274
Prandtl-Meyer Flow	p. 282
Taylor-Maccoll Flow	p. 287
References	p. 295
Problems	p. 295
Sweep	
Preliminary Remarks	p. 297
Oblique Shock Flow	p. 297
Prandtl-Meyer Flow	p. 307
References	p. 318
Problems	p. 319
Interaction of an Expansion Wave with a Shock Wave	
Preliminary Remarks	p. 322
Flow Topology	p. 323
Solution for Regions I, II, and III	p. 326
Curvature Singularity	p. 328
Numerical Procedure	p. 331
References	p. 335
Problems	p. 336
Unsteady, One-Dimensional Flow	
Preliminary Remarks	p. 337
Incident Normal Shock Waves	p. 337
Reflected Normal Shock Waves	p. 343
Characteristic Theory	p. 348
Rarefaction Waves	p. 354
Compression Waves	p. 374
Internal Ballistics	p. 378
Nonsimple Wave Region	p. 386
References	p. 411
Problems	p. 411
Viscous/Inviscid Fluid Dynamics	
Outline of Part III	p. 419
Coordinate Systems and Related Topics	
Preliminary Remarks	p. 421
Orthogonal Coordinates	p. 421
Similarity Parameters	p. 427
Bulk Viscosity	p. 430
Viscous Flow in a Heated Duct	p. 432
References	p. 440
Problems	p. 441
Force and Moment Analysis	

Preliminary Remarks	p. 447
Momentum Theorem	p. 447
Surface Integral	p. 450
Angular Momentum	p. 455
Hydrostatics	p. 456
Flow in a Duct	p. 458
Acyclic Motion	p. 460
Jet-Plate Interaction	p. 461
Syringe with a Hypodermic Needle	p. 463
Shock-Expansion Theory	p. 466
Forces on a Particle	p. 473
Entropy Generation	p. 478
Forces and Moments on a Supersonic Vehicle	p. 485
References	p. 491
Problems	p. 492
Exact Solutions for a Viscous Flow	
Outline of Part IV	p. 499
Rayleigh Flow	
Preliminary Remarks	p. 501
Solution	p. 503
References	p. 508
Problems	p. 508
Couette Flow	
Preliminary Remarks	p. 511
Solution	p. 512
Adiabatic Wall	p. 517
Reference	p. 518
Problems	p. 518
Stagnation Point Flow	
Preliminary Remarks	p. 521
Formulation	p. 522
Velocity Solution	p. 526
Temperature Solution	p. 530
Reference	p. 533
Problems	p. 533
Laminar Boundary-Layer Theory for Steady Two-Dimensional or Axisymmetric Flow	
Outline of Part V	p. 537
References	p. 538
Incompressible Flow over a Flat Plate	
Preliminary Remarks	p. 539
Derivation of the Boundary-Layer Equations	p. 539

Similarity Solution	p. 542
References	p. 547
Problems	p. 549
Large Reynolds Number Flow	
Preliminary Remarks	p. 549
Matched Asymptotic Expansions	p. 560
Governing Equations in Body-Oriented Coordinates	p. 562
References	p. 563
Problems	p. 563
Incompressible Boundary-Layer Theory	
Preliminary Remarks	p. 565
Primitive Variable Formulation	p. 566
Solution of the Boundary-Layer Equations	p. 568
References	p. 574
Problems	p. 575
Compressible Boundary-Layer Theory	
Preliminary Remarks	p. 577
Boundary-Layer Equations	p. 578
Solution of the Similarity Equations	p. 584
Solution of the Energy Equation	p. 588
The $\beta$ and $g_w$ Parameters	p. 589
Local Similarity	p. 592
Boundary-Layer Parameters	p. 595
Comprehensive Tables	p. 603
Adiabatic Wall	p. 615
Critique of the Prandtl Number and Chapman-Rubensin Parameter Assumptions	p. 617
Nonsimilar Boundary Layers	p. 625
Nonsimilar Boundary Layers--II	p. 627
References	p. 638
Problems	p. 640
Supersonic Boundary-Layer Examples	
Preliminary Remarks	p. 645
Thin Airfoil Theory	p. 645
Compressive Ramp	p. 651
Zero Displacement Thickness Wall Shape	p. 656
Performance of a Scramjet Propulsion Nozzle	p. 660
References	p. 664
Problems	p. 664
Second-Order Boundary-Layer Theory	
Preliminary Remarks	p. 669
Inner Equations	p. 674

Outer Equations	p. 680
Boundary and Matching Conditions	p. 686
Decomposition of the Second-Order Boundary-Layer Equations	p. 691
Example: First-Order Solution	p. 698
Example: Second-Order Outer Solution	p. 703
Example: Second-Order Inner Equations	p. 707
References	p. 720
Problems	p. 721
Appendices	
Summary of Equations from Vector and Tensor Analysis	p. 725
Jacobian Theory	p. 739
Oblique Shock Wave Angle	p. 751
Conditions on the Downstream Side of a Steady Shock Wave in a Two-Dimensional or Axisymmetric Flow of a Perfect Gas	p. 755
Method-of-Characteristics for a Single, First-Order PDE	p. 759
Tangential Derivatives on the Downstream Side of a Shock in the $x_1$ and $x_2$ Directions	p. 765
Conservation and Vector Equations in Orthogonal Curvilinear Coordinates $x_i$	p. 767
Conservation Equations in Body-Oriented Coordinates	p. 769
Summary of Compressible, Similar Boundary-Layer Equations	p. 773
Second-Order Boundary-Layer Equations for Supersonic, Rotational Flow over a Flat Plate	p. 779
Index	p. 783
