Preface

Steering Committee

A Review of Studies of Boron Ignition and Combustion Phenomena at Atlantic Research Corporation over the Past Decade p. 1

Methods for the Characterization of Boron p. 81

Combustion of Boron-Containing Fuels in Solid Fuel Ramjets p. 91

Recent Studies of the Kinetics of Solid Boron Gasification by B$^{[\text{subscript} 2]}\text{O}^{[\text{subscript} 3\text{(g)}]}$ and Their Chemical Propulsion Implications p. 113

Overview of Boron Ducted Rocket Development During the Last Two Decades p. 133

Bonding Analysis of Coated Boron Powder p. 181

Mixing of Hydroxyl-Terminated Polybutadiene and Boron p. 190

Dispersion and Self-Ignition Characteristics of Boronorganic Compounds Behind the Shock Waves p. 196

Oxidation of Boron in Air p. 205

A Simple Model of the Oxidation Kinetics of Boron in a Medium Containing Water Vapor p. 211

Investigation of Boron Ignition and Combustion by Means of Fast Cinespectography p. 218

Interfacial Instability Indicating Boron Particle Ignition p. 232

Ignition and Combustion of Boron Particles p. 248

Ignition and Combustion of Boron in Chlorine p. 272

Analysis of Boron Particle Ignition Above a Solid Fuel in a High-Velocity Environment p. 303

Effect of Magnesium-Coated Boron Particles on Burning Characteristics of Solid Fuels in High-Speed Crossflows p. 332

Thermal Decomposition and Deflagration of Solid Boranehydrazine p. 348

Combustion of Boron-Based Slurries in a Ramburner p. 353

Boron Propellants for Ducted Rocket Application p. 361

Combustion Study of Boron-Based Fuel-Rich Solid Propellant p. 375

Combustion Behavior of Boron-Based Solid Propellants in a Ducted Rocket p. 386

Effect of Gaseous Fuel Mixing on Boron Combustion in Ducted Rocket with Side Dump p. 402

Experimental Investigation of the Effect of Bypass Air on Boron Combustion in a Solid Fuel Ramjet p. 427

Temperature Sensitivity Measurements and Regression Behavior of a Family of Boron-Based VHBR Propellants p. 438

The Ignition and Combustion of Boron Dust Systems p. 455

The Premixed Laminar Flames in the Boron Dust Clouds p. 469

Comparative Research of the Flame Propagation in Boron and Al, Mg, Zr, Fe Dust Clouds p. 478

The Ignition of Boron-Magnesium Dust Clouds p. 485

Mixing Effect on Critical Conditions of Boron Aerodispersed System Ignition p. 496

A Simplified Model for the Boron Laminar Diffusion Dust Flame p. 501
