Process safety performance indicators - a tool to help senior managers show process safety leadership  p. 1
Selecting risk control measures - why organisations often demonstrate poor risk management  p. 16
Some observations about major chemical accidents from recent CSB investigations  p. 34
Buncefield - legal impacts  p. 49
Challenging the 'SHE' culture in the Russian Federation  p. 62
Accidents of the next 15 years?  p. 73
Lessons learned equals improved safety culture  p. 82
Unlocking safety culture excellence: our behaviour is the key  p. 93
Managing risk competence  p. 105
Integrity management for the 21st century with 20th century equipment  p. 112
Bundling at Buncefield: successes, failures and lessons learned  p. 121
Practical implementation of a PPC site protection and monitoring plan  p. 134
A successful regulatory intervention at William Blythe from despair to delivery  p. 146
What do we want to sustain and how do we decide?  p. 154
The implementation of IPPC under Schedule 1, Section 4.5 part A (1) a), for a small manufacturing enterprise, producing contract chemicals under a multiproduct protocol  p. 170
Investigation into a fatal fire at Carnuald Metalbox Ltd  p. 182
The only good waste is 'dead' waste - WASOP, a methodology for waste minimisation within complex systems  p. 192
Impact of emergency shutdown devices on relief system sizing and design  p. 215
Background to and experience using the NII's new safety assessment principles - learning for the high hazard sector?  p. 236
Explosion processes and DDT of various flammable gas/air mixtures in long closed pipes containing obstacles  p. 247
Acceptance criteria for damaged and repaired passive fire protection  p. 262
Competence assurance in the major hazard industries  p. 279
Moodle e-learning environment - an effective tool for a development of a learning culture  p. 290
Using ARX approach for modelling and prediction of the dynamics of a reactor-exchanger  p. 297
Integrating risk into your plant lifecycle - a next generation software architecture for risk based operations  p. 306
Assessment of high integrity instrumented protective arrangements  p. 316
Considerations for layer of protection analysis for licensed plant  p. 325
Harmfulness and hazard categorisation - impact of emerging technologies on equipment design in the mining industry  p. 333
Designing for safety - how to design better water treatment works  p. 351
Guidance on effective workforce involvement in health and safety  p. 362
Development of an efficient safety and learning culture in Romanian small and medium enterprises (SME's) through virtual reality safety tools  p. 373
Knowledge transfer - critical components in occupational health and safety - an Estonian approach  p. 385
Industrial processing sites - compliance with the new Regulatory Reform (Fire Safety) Order 2005  p. 398
The revised EN 13463-1 standard for non-electrical equipment for use in potentially explosive atmospheres  p. 410
Implementation experience of ATEX 137 for a petrochemical site  p. 421
Practical application of static hazard assessment for DSEAR compliance  p. 431
Experiences with the application of IEC 61511 in the process industry in Austria  p. 441
Independent review of some aspects of IP 15 Area classification code for installations handling flammable fluids  p. 454
Potential for flashback through pressure/vacuum valves on low-pressure storage tanks synopsis  p. 469
Methods of avoiding tank bund overtopping using computational fluid dynamics tool  p. 479

Hazards in the maritime transport of bulk materials and containerised products  p. 496
The causes of IBC (international bulk container) leaks at chemical plants - an analysis of operating experience  p. 511
Liquid dispersal and vapour production during overfilling incidents  p. 522
Continuous monitoring of risks - people, plant and process  p. 537
The necessity of trust and 'creative mistrust' for developing a safe culture  p. 549
Using the best available techniques to change behaviour in the construction industry  p. 557

Implementing and sustaining human reliability programmes of work - a managers' guide  p. 567
Improving shift handover and maximising its value to the business  p. 577
An investigation into a 'weekend (or bank holiday) effect' on major accidents  p. 590
Is HAZOP always the method of choice for identification of major process plant hazards?  p. 603

HAZOP for dust handling plants: a useful tool or a sledgehammer to crack a nut?  p. 611
A rule-based system for automated batch HAZOP studies  p. 617
A consistent approach to the assessment and management of asphyxiation hazards  p. 630
Interpretation of the HCR for QRA - and its application beyond the North Sea  p. 641
An improved approach to offshore QRA  p. 652
Handling of reactive chemical wastes - a review  p. 671
Dewar scale-up for reactive chemical waste handling  p. 682
What kind of relationship do you have with your tollers?  p. 701
Thermal stability at elevated pressure - an investigation using differential scanning calorimetry  p. 717
Case studies in hazards during early process development  p. 729
Adapting the EU Seveso II Directive for the globally harmonised system of classification and labelling of chemicals (GHS) in terms of acute toxicity to people: initial study into potential effects on UK industry  p. 743
Practical experience in radio frequency induced ignition risk assessment for COMAH/DSEAR compliance  p. 760
Lessons learnt from decommissioning a top tier COMAH site  p. 775
A safety culture toolkit - and key lessons learned  p. 787
