Space charge in dielectrics: old theories and new measurements  p. 1
Too insulating or not too insulating?  p. 9
The electrical properties of filled and unfilled commercial epoxy resins  p. 15
Influence of chromate fillers on dielectric properties of coating  p. 21
Electrode effects on the dielectric permittivity of SiO\textsubscript{2} thin films  p. 25
The effect of material composition and temperature on electrical tree growth in epoxy resins  p. 30
The effect of voltage, temperature and morphology on electrical treeing in polyethylene blends  p. 35
The effect of environmental stress cracking on water tree growth  p. 41
An investigation of the factors affecting the growth of bow tie water trees in XLPE insulation systems  p. 47
Selective detection of water trees in cables  p. 53
Space charge measurements in polyethylene under DC and AC operating conditions using the PEA technique  p. 57
Observation of charge accumulating process in PMMA under electron beam irradiation  p. 63
Space charge measurements in XLPE insulation under 50Hz AC electric stress  p. 68
Space charge measurements in power cables using a modified PEA system  p. 74
The influence of environmental conditions on the macroscopic physical properties of outdoor insulator  p. 80
Non-linear AC properties of filled resin  p. 84
Charge injection, electroluminescence and ageing of an epoxy resin in high divergent fields  p. 88
Effects of ionic component on the dielectric and thermal properties of epoxy resins  p. 94
DC treeing breakdown phenomena of LDPE at cryogenic temperature  p. 98
Dielectric study of dendritic macromolecules  p. 102
Influence of different types of oil and paper to the dielectric response of oil-paper insulation systems  p. 106
Application of an automated PD failure identification system for EMC-assessment strategies of multiple PD defects at HV-insulators  p. 112
Study of fast transients generated in a GIS bus duct in compressed SF\textsubscript{6}-N\textsubscript{2} gas mixtures containing lower percentages of SF\textsubscript{6}  p. 118
Investigation into the use of wavelet theory for partial discharge pulse extraction in electrically noisy environments  p. 123
Separation of multiple and concurrent partial discharge phenomena  p. 127
Development and application of a portable multipurpose on-site/on-line PD measuring system  p. 133
UHF PD detection in GIS substations during on-site testing  p. 139
A novel concept for monitoring partial discharge on EHV-cable system accessories using no active components at the accessories  p. 145
Lightning impulse withstand of SF\textsubscript{6}-N\textsubscript{2} mixtures with low SF\textsubscript{6} content under homogeneous and divergent field  p. 150
Dielectric strengths of CO\textsubscript{2} and N\textsubscript{2} containing SF\textsubscript{6} under alternating voltage in non-uniform field  p. 156
SF\textsubscript{6}-N\textsubscript{2} gas mixtures: Optical investigation of the discharge development under fast oscillation impulse stress in a non-uniform gap

The breakdown voltage estimation of SF\textsubscript{6}+N\textsubscript{2} mixture using neural network approach

Dielectric and mechanical properties of waste polyethylene - natural rubber blends

The multiple-arc analysis for dielectric dispersions

Domain switching of PLZT 9/65/35 in ferroelectric electron emission

Analysis of internal charge evolution in paper insulation, via PEA method

A new fuzzy information optimization processing technique for monitoring the transformer

Design features of the test cells for conductivity measurements in dielectric liquids

Degradation of silicone gel by partial discharges due to different defects

Analysis of TSDC spectra for polyimide aged in a simulated space environment

Broadband measurement of the conductivity and the permittivity of semiconducting materials with high voltage XLPE cables

High voltage plant monitoring through oil/paper analysis

Degradation of dodecybenzene under conditions of high electric field

Conductivity of interconnected channels in water treed cross-linked polyethylene

Partial discharge patterns and the identification of defects in high voltage stator windings insulation

Dielectric behaviour of AC aged XLPE cables

On modeling and testing metal oxide resistors to evaluate the arrester withstanding energy

Surface potential measurements: implementation and interpretation

The step-electro-acoustic method for observation of the interfacial charges in insulators

Temperature dependence of resistivity of carbon black-polyethylene composites below and above the percolation threshold

Condition monitoring of power transformers through partial discharge measurement: problems associated with pulse distortion in the windings

A software for the statistical analysis of the results of lightning impulse testing

Influence of different test conditions on volume resistivity of polymeric insulated cables and polyethylene samples

Investigation of the ageing performance of AlN-ceramic used in high-power-semiconductors

Simulation of transformer behaviour subject to fast transients using a tesla transformer

Application of statistical methods simplified to the testing of dielectric strength of insulating liquids

Assessment of insulation materials aged by surface discharges

Uncertainty in transmission line microwave measurements

The structure of electrical trees in semi-crystalline polymers
Occurrence and measurement of surface charges in the interrupter units of high-voltage circuit-breakers p. 320
Statistical and neural network analysis of dissolved gases in power transformers p. 324
Intelligent system applied in diagnosis of transformer oil p. 330
The possibilities and limits of estimation of ageing degree of paper-oil insulation in power transformers by recovery voltage method p. 335
Recent progress in the characterization of conduction losses in dielectric liquids p. 341
The use of spectroscopy with chemometrics to assess the condition and predict the lifetime of paper and oil used as transformer insulation p. 346
Advanced pulsed electro-acoustic system for space charge measurement p. 352
Study of amorphous phase evolutions of cable insulator during accelerated ageing program p. 357
Dielectric and viscoelastic relaxation behaviours of polyethylene 2,6 napthalene dicarboxylate (PEN) p. 363
Dynamic measurement of surface charge p. 369
Comparing different stochastic models for the identification and separation of concurrent partial discharge phenomena p. 374
Porous polytetrafluoroethylene (PTFE) single-film space-charge electrets with high piezoelectric coefficients p. 380
Pyroelectric properties of the PTCa/PEKK composite transducers p. 386
The performance of aged stress grading materials for use in electrical machines p. 392
Role of thermal effects in discharge degradation of micas used in high power rotating machines p. 397
Investigation of the structural changes in LDPE and XLPE induced by high electrical stress p. 403
The importance of mechanical properties for increasing the electrical endurance of polymeric insulation p. 408
Multi-stress electrical and thermal ageing of HV extruded polymeric cables: mechanisms and methods p. 413
A probabilistic design method for polymeric structures to operate at high electrical stress p. 419
The high field transport properties of polyethylene investigated by the electrostatic mirror technique p. 425
Electroluminescence measurements in polyethylene insulation p. 430
Analysis of electroluminescence VS AC voltage characteristic of metallized polymer films p. 434
Thermo-optical characteristics of refractory dielectric materials in a field of high intensity radiation p. 440
Surface displacement mapping of piezoelectric multilayer actuators p. 445
Conception of integrated polymer antennas for characterisation of dielectric properties p. 448
First commercial application of new monitoring systems against water ingress and overtemperatures in HV-XLPE-cables p. 452
Substrate curvature measurement system p. 458
The existence of floating electrodes and the results of impulse tests p. 464
Improvements in the electrical and mechanical strength of pre-stressed insulation p. 470
The effect of paper properties on the temperature and stress dependence of the resistivity of impregnated laminates p. 474

Investigation into the positive temperature coefficient effect in polyethylene/carbon black composites p. 480

Ion beam induced deposition of dielectric nanostructures p. 485

Electromechanical properties of 0-3 vegetable based Polyurethane and Lead Zirconate Titanate composite p. 491

Electromagnetic finite differences time domain (FDTD) modeling of partial discharge coupling applied to high voltage cables and cable joints p. 497

Acoustic emission techniques for partial discharge detection within cable insulation p. 503

Investigation of temperature effect on an epoxy resin: ageing due to partial discharges p. 509

Correlations among light emission and partial discharge measurements made during electrical tree growth p. 513

Space charge, local electric field and partial discharges p. 519
