Risk Factors Associated with Foodborne Illness

The Site of Foodborne Illness. The Alimentary Tract: Its Function and Microflora

The Pathogenesis of Diarrhoeal Disease

Bacterial Agents of Foodborne Illness

Aeromonas hydrophila

Introduction

Bacillus cereus and Other Bacillus Species

Introduction

Brucella

Introduction

Campylobacter

Introduction

Clostridium botulinum

Introduction

Clostridium perfringens

Introduction

Escherichia coli

Introduction

The Organism and its Characteristics

Pathogenesis and Clinical Features

Enterotoxigenic E. coli (ETEC)

Enteroinvasive E. coli (EIEC)

Enteropathogenic E. coli (EPEC)

Enterohaemorrhagic E. coli (EHEC)

Isolation and Identification

Association with Foods

Listeria monocytogenes

Introduction

The Organism and its Characteristics

Pathogenesis and Clinical Features

Isolation and Identification

Association with Foods

Mycobacterium Species

Introduction

The Organism and its Characteristics

Pathogenesis and Clinical Features

Isolation and Identification

Assocation with Foods

Plesiomonas shigelloides

Introduction

The Organism and its Characteristics

Pathogenesis and Clinical Features

Isolation and Identification

Assocation with Foods

Salmonella

Introduction

The Organism and its Characteristics

Pathogenesis and Clinical Features

Enteritis

Systemic Disease

Isolation and Identification

Association with Foods

Shigella

Introduction

The Organism and its Characteristics

Pathogenesis and Clinical Features

Isolation and Identification

Association with Foods
