Applications to Polyolefin Catalysis

Ethylene Oligomerization and Polymerization Catalysts Supported by Boratabenzene Ligands p. 3

Borate, Boryl and Borole Compounds and their Role in Olefin Polymerisation Catalysis p. 10

Group 4 Complexes Derived from o-Carborane: Catalytic and Luminescent Properties p. 20

Cationic Metallocenes Derived from Cyclic Organo-hydroborate Metalloocene Complexes p. 28

Organolanthanide Complexes Bearing Versatile Ligands p. 36

Aluminoxanes via Boron Compounds p. 40

Highly Fluorinated closo-Borane and -Carborane Anions p. 44

Materials and Polymers

A New Class of [pi]-Conjugated Organoboron Polymers p. 51

Catalytic Syntheses of Linear Polycarboranes p. 59

Thermal, Photochemical, and Redox Reactions of Borane and Metallaborane Clusters with Applications to Molecular Electronics p. 67

Engineered Fullerenes-Carborane Conjugated Rods: New Hybrid Materials for NLO Devices p. 77

Aminoboranes as Versatile Precursors of Boron Nitride: Preparation of BN Matrices, Coatings and Fibres p. 84

Borosilicate Cage Chemistry p. 92

Acid-Base Properties of Anhydrous Borate Systems p. 96

Synthesis and Lewis Acidity of Organo B-O-Si and B-O-Sn Derivatives p. 100

Synthesis and Properties of Vanadoborate Cluster Materials p. 104

Medicinal Applications

Synthesis of Boron-rich Building Blocks for Phosphodiester Oligomers in Boron Neutron Capture Therapy p. 115

The Development of Boron Neutron Capture Agents Utilizing Positron Emission Tomography p. 120

Synthesis and Evaluation of DNA Tumor Targeting Agents for Neutron Capture Therapy p. 127

Stabilised Liposomes with Double Targeting for Use in BNCT p. 131

A New Medicinal Application of Boron Clusters. Potent Nuclear Receptor Ligands Bearing Carborane as a Hydrophobic Pharmacophore p. 139

closo-Decaborate (2[superscript -]) Anion as a Prosthetic Group for Labelling Proteins with Astatine p. 144

Effect of Ionising Radiation on the Labelling of closo-Dodecaborate(2[superscript -]) Anion with [superscript 125]I p. 148

Cluster Synthesis

Reactions of the Undecaborate Anion $[\text{B}_{11}\text{H}_{11}]^{2-}$ p. 159

Synthesis of Schiff Bases and Monoalkylamino Derivatives of closo-Dodecaborate(2$^{-}$) Anion p. 163

Chemistry of Inner Sulfonium Salts of Dodecaborane p. 167

Progress in the Chemistry of Fused-cage Boranes and Heteroboranes p. 175

8$^{-}$H$^{[\text{B}_{11}\text{H}_{11}]^{2-}}$, and New Insights into the Structures of Other Octaborane Species p. 179

Tetraboranes of the Type $\text{B}^{[\text{subscript 4}]R^{[\text{subscript 4}]}}$, $\text{B}^{[\text{subscript 4}]H^{[\text{subscript 4}]}}$ and $\text{B}^{[\text{subscript 4}]H^{[\text{subscript 4}]}}$ p. 187

Carboranes

Broadening the Conflux of Boron and Carbon Chemistries p. 197

Skeletal Rearrangements following Electrophilic Alkylation of 7,8- and 7,9-Dicarbollide Anions (A Review) p. 205

New Routes to Carboranes p. 212

New Routes to Small Carboranes p. 215

Studies of Icosahedral Carboranes with Iminotris(dimethylamino)phosphorane, HNP(NMe[subscript 3])[subscript 2][subscript 3] p. 223

Synthesis and Properties of Some Novel o-Carborane-containing Synthons p. 237

Unusual Double Silylation Reactions of Bis(silyl)metal Complexes with o-Carboranyl Unit p. 244

Cyclisation of Cage-carborane Compounds using Transition Metal Catalysts and Carbene Intermediates p. 248

Metallaboranes

Intercomparison of Syntheses and Structures of Mono- and Dimetallaboranes Containing Transition Metals from Groups 5-9 p. 255

Reactions of Bidentate Phosphines with Metallaboranes: Possible Routes to Linked Cluster Systems p. 263

Preparation of Bidentate Phosphine Derivatives and their Reactions with nido-{$[(\text{PPH}[\text{subscript 3}]) \text{subscript 2} (\text{CO})\text{OsB subcript 5 H subscipt 9}]$ Crystal and Molecular Structure of $[(\text{p-cym})\text{RuCl}[\text{subscript 2}] - \text{PPh}[\text{subscript 2}]\text{CH}[\text{subscript 2}]\text{C}[\text{subscript 6}]\text{H}[\text{subscript 4}]\text{H}[\text{subscript 4}]\text{CH}[\text{subscript 2}]\text{P} - \text{BH subcript 3]}$ p. 271

Metal Borides: Interstitial Boron at the Molecular Level p. 275

Metallaheteroboranes

The Ligating Properties of the Anionic Rhenacarboranes $[\text{Re}(\text{CO})[\text{subscript 3}][\text{eta superscript 5}-7,8-\text{C}[\text{subscript 2}]\text{B}[\text{subscript 9}]\text{H}[\text{subscript 11})[\text{subscript 11}]$ superscript -] and $[\text{Re}(\text{CO})[\text{subscript 3}][[\text{eta superscript 5}-7-\text{CB}[\text{subscript 10}]\text{H}[\text{subscript 11}]$ superscript 2-] p. 291

Carboranes and Metallacarboranes: Chemistry in New Directions p. 299

Pyrrole and o-Carborane p. 308

Metallacarboranes and Metal Amides p. 316
Novel Osmacarboranes: Reactivity and Application to the Syntheses of exo-Os-closo-M'-Bimetallacarboranes
Towards Experimental Mapping of the Mechanism of Heteroborane Isomerisation
