Introduction to Ceramics and Glasses

Introduction

Overview of Traditional Ceramics

Overview of Technical, Engineering, and Advanced Ceramics

Overview of Traditional and Advanced Glasses

Characterization of Ceramics and Glasses: An Overview

Overview of Ceramic Design and Process Engineering

Guide to Information Sources and Standards

Ceramic Powders and Processing

Introduction

Powder Production and Synthesis

Raw Materials

Chemical Synthesis

Characterization of Ceramic Powders

Powder Treatment: Preconsolidation

Comminution

Particle Sizing

Filtration and Washing

Batching and Mixing

Granulation and Spray Drying

Calcination

Processing Additives

Forming and Predensification, and Nontraditional Densification Processes

Introduction

Fundamentals

Mechanical Consolidation

Drying

Organics Removal

Powder Compaction Processes

Dry Pressing

Cold Isostatic Pressing

Slip Casting

Tape Casting

Extrusion

Injection Molding

Green Machining

Nontraditional Densification Processes

Hot Pressing

Hot Isostatic Pressing

Molten Particle Deposition

Sol-Gel Process
Vapor Deposition  
Polymer-Derived Ceramics  
Self-Propagating, High-Temperature Synthesis  
Directed Metal Oxidation  
Reaction-Forming Processes  
Firing/Sintering: Densification  
Introduction  
Furnaces and Related Equipment  
The Firing Process  
Fundamentals of Sintering  
Solid-State Sintering  
Liquid-Phase Sintering  
Reaction Sintering  
Pressure Densification  
Grain Growth  
Final Shaping and Surface Finishing  
Introduction  
Abrasive Machining Processes  
Principles of Abrasive Machining  
Abrasives  
Production Grinding Methods and Techniques  
Lapping, Honing, and Polishing  
Ultrasonic Machining  
Abrasives Fluid Jet Machining  
Non-Abrasive Machining Processes  
Laser Beam Machining  
Electrical Discharge Machining  
Glass Processing  
Introduction  
Raw Materials/Batching  
Melting/Fining  
Forming  
Special Processes  
Fiberglass  
Optical Fibers  
Glass Spheres  
Laminated Glass  
Porous and Reconstructed Glasses  
Phase-Separated Glasses and Glass-Ceramics  
Photosensitive Glasses and Glass-Ceramics  
Sol-Gel Processes
Secondary Processing
Annealed and Tempered Glass p. 453
Ion-Exchange p. 460
Grind/Polish p. 464
Decorating p. 471
Joining
Introduction p. 477
Types of Ceramic Joining and Their Uses p. 478
Wetting, Surface Energies, Adhesion, and Interface Reaction Thermodynamics p. 482
Glass/Metal and Glass-Ceramic/Metal Seals p. 493
Ceramic/Metal Seals p. 502
Joining Oxide Ceramics p. 511
Joining Non-Oxide Ceramics p. 523
Techniques of Seal Design p. 532
Metallizing p. 542
Testing, Characterization, and NDE
Introduction p. 547
Chemical Analysis p. 549
Phase Analysis p. 557
Structural and Properties of Glasses p. 564
Microstructural Analysis p. 570
Porosity, Density, and Surface Area Measurements p. 580
Strength and Proof Testing p. 585
Toughness, Hardness, and Wear p. 599
Thermophysical Properties p. 610
NDE Testing and Inspection p. 617
Failure Analysis
Introduction p. 629
Overview of Failure Analysis p. 630
Special Terminology Used in Fractography p. 632
Principles of Failure Analysis p. 635
Descriptive Fractography p. 645
Applied Fracture Mechanics p. 652
Quantitative Fracture Surface Analysis p. 663
Case Histories
Fracture Surface Analysis of Optical Fibers p. 669
Glass-Ceramic Cookware Failure Analysis p. 676
Design Considerations
Introduction p. 675
An Overview of the Ceramic Design Process p. 676
Ceramic Properties Database Systems p. 690
