Trends in Automotive Applications of Thermal Spray Technology in Japan p. 1
Production Plasma Spraying in the Automotive Industry: A European Viewpoint p. 7
The Effect of Microstructure on the Wear Behavior of Thermal Spray Coatings p. 19
Thermally-Sprayed Self-Lubricating Composites from Cored Wires - Part I: Fabrication and Chemistry p. 25
Thermally-Sprayed Self-Lubricating Composites from Cored Wires - Part II: Mechanical and Tribological Properties p. 33
Method and Apparatus for the Application of Thermal Spray Coatings onto Aluminum Engine Cylinder Bores p. 39
High-Deposition Rate Coating of Aluminum Cylinder Bores p. 43
The Effect of Silica on the Cyclic Life of a Zirconia-Yttria Thermal Barrier Coating p. 49
The Effect of Bond Coat Oxidation on the Failure of Thermal Barrier Coatings p. 55
Characterization of a New Aerospace Thermal Barrier Coating p. 61
Thermal Spray Coatings for Protection of Polymeric Composite Aircraft Components p. 67
Lightweight TiC/Ti Alloy Wear Resistant Coatings for Lightweight Materials in Aerospace Applications p. 73
Hard Particle Reinforced Aluminum-Alloys For Aircraft Applications EWISCO 1993-1994 p. 79
Thermal Durability and Abradability of Plasma Sprayed Al-Si-Polyimide Seal Coatings p. 85
Replacement of Environmentally Hazardous Corrosion Protection Paints on the Space Shuttle Main Engine Using Wire Arc Sprayed Aluminum p. 93
An Improved Cr[subscript 3]C[subscript 2]-NICHROME Powder p. 99
Corrosion Properties of Stainless Steel Coatings Made by Different Methods of Thermal Spraying p. 105
Metal Seated Ball Valves with Carbide Coatings p. 111
Abrasion and Erosion Wear Resistance of Cr[subscript 3]C[subscript 2]-NiCr Coatings Prepared by Plasma, Detonation and High-Velocity Oxyfuel Spraying p. 121
Investigation of Erosion-Resistant Chromium Carbide Coatings Sprayed with the High Pressure HVOF Process p. 127
Thermal Sprayed Coatings of Structural Components and Equipment of Power Stations p. 135
Enhancement of Heat Exchanger Surfaces: Interfacial Reactions During Thermal Spraying p. 141
Effect of Powder Feedstock on Thermal Sprayed Hydroxyapatite Coatings p. 147
Laser Post-Treatment of Thermally Sprayed Hydroxyapatite Coatings p. 153
Investigation of Combustion Sprayed Hydroxyapatite/Polymer Composite Coatings p. 159
Bending and Thermal Stresses in a Fatigue Experiment of Hydroxyapatite Coated Titanium Rods p. 165
Mechanofused Metal-Carbide-Oxide Cermet Powders for Thermal Spraying p. 171
Chromium Coatings by HVOF Thermal Spraying: Simulation and Practical Results p. 179
High Temperature Intermetallic Binders for HVOF Carbides p. 185
Chromium Diboride Powder as the Material for Plasma Spraying p. 191
VPS-Mullite-Coatings for Oxidation Protection of Structural Components Operated at High Temperatures in Air Atmosphere p. 195

Formation Behaviour of New Amorphous and Composite Materials in Detonation Gun and Plasma Spraying p. 201

Copper-Ceramic Composite Coatings for Steel Strip Casting p. 205

Studies of the Air Plasma Spraying of Zirconia Powder p. 211

Manufacturing of [actual symbol not reproducible] Coatings by Low Pressure and Atmospheric Plasma Spraying for Magnetic Shielding Applications p. 221

Parameters Controlling the Sand Blasting of Substrates for Plasma Spraying p. 227

Process Gases for High Velocity Oxy-Fuel Thermal Spraying p. 233

Correlations Between Spraying Conditions and Microstructure for Alumina Coatings Produced by HVOF and VPS p. 239

Calculation of the Limiting Parameters for Oxide Ceramic Particles During HVOF Spraying p. 245

Rapidly Solidified High Strength Deposits of Fe-C Base Alloys Produced by Low Pressure Plasma Spraying p. 251

A Progress Update for the Pressure Controlled Atomization Process p. 257

The Characteristics of Coatings Applied by the DEMETON Detonation Gun Process p. 269

The Spraying of Coating by Supersonic Metalization p. 275

Underwater Plasma Spraying and Synthesis of Coatings p. 281

Underwater Plasma Spraying for Components Located in Greater Water Depths p. 291

New Plasma Spray Apparatus p. 297

Safety Devices Required for the Use of Hydrogen in Plasma Spraying p. 303

Turbulent Mixing of the HVOF Thermal Spray and Coating Oxidation p. 307

HVOF Gas Flow Field Characteristics p. 313

HVOF Particle Flow Field Characteristics p. 319

Comparison of the Characteristics of HVOF and Plasma Thermal Spray p. 325

Particle Velocity Measurements in HVOF and APS Systems p. 331

The Effect of Nozzle Design on Plasma Jet Behavior, Particle Motion, and Coating Properties p. 337

Particulate Diagnostics in Induction Plasma Spraying p. 343

Effect of Nozzle Profile on Gas Mixing in an Atmospheric and Low Pressure DC Plasma Jet p. 355

Computer-Aided Simulation and Experimental Study of Dusted Plasma Jets Emitting into Limited Space p. 361

Investigation of Dispersion Processes of Sprayed Particles by Means of Torch Modulation p. 367

Aerodynamic Behavior Within the Arc Gap During Arc Spraying p. 371

Numerical Investigation of Micro-Pore Formation During Substrate Impact of Molten Droplets in Spraying Processes p. 375

Analysis of a High Velocity Oxygen-Fuel (HVOF) Thermal Spray Torch - Part 2: Computational Results p. 387
Theoretical Investigation of the Gas-Powder Particles Transport Phenomena in HVOF Spraying

Particle Classification Effects During Plasma Spraying

Deformation and Solidification of Molten Particles on a Substrate in Thermal Plasma Spraying

Net Shape Simulation and Control

Energy Distribution and Computer Modeled Nozzle Design in High Pressure Water Jet Coating Removal

Expert System for the Plasma Spray Process

On-Line Control of the Plasma Spraying Process by Monitoring the Temperature, Velocity, and Trajectory of In-Flight Particles

Control Modeling and Regulation of Plasma Spraying Process

Automated Thermal Spray System (ATSS) for Infrastructure Rehabilitation and Maintenance

Induction Plasma Reactive Deposition of Tungsten and Titanium Carbides

Near-Net Shape Forming of Ceramic Refractory Composite High Temperature Cartridges by VPS

On the Optimal Motion Planning for Solid Freeform Fabrication by Thermal Spraying

Vacuum Plasma Spray Forming of Astroloy: An Investigation of Processing Parameters

Materials Processing with De Laval Spray-Forming Nozzles: Net-Shape Applications

The Plasma Spray Forming of Astroloy

Plasma Spraying with Wire Feedstock

Evaluation of Tungsten Shaped-Charge Liners Spray-formed Using the Low-Pressure Plasma Spray Process

Modeling Results of the High Temperature Pressure-Controlled Atomization Process (PCAP)

Fabrication of Composite Spray Powders using Reaction Synthesis

Reactive Plasma Spraying of Silicon in Controlled Nitrogen Atmosphere

Plasma Spraying of High Nitrogen Steels

On the Effects of Sealing Treatment and Micro-Structural Grading Upon Corrosion Characteristics of Plasma-Sprayed Ceramic Coating

Thermally Sprayed Alumina Coatings with Strongly Improved Wear and Corrosion Resistance

Effect of Post Treatments on the Corrosion Resistance of Plasma Sprayed Duplex Stainless Steel Coating in Salt Water

Improvement of Plasma-Sprayed Ceramic Coating Properties by Heat-Treatment with Liquid Mn

Sealing of Plasma-Sprayed Ceramic Coatings by Sol-Gel Process

Dynamics of Splat Formation and Solidification in Thermal Spraying Processes

Behavior of Molten Droplets Impinging on Flat Surfaces

Effect of Particle Velocity and Substrate Temperature on Alumina and Zirconia Splat Formation

Comparison of Plasma Sprayed Alumina and Zirconia Coatings by RF and DC Plasma Spraying
Monitoring of Residual Stress Generation during Thermal Spraying by Curvature Measurements
Effect of Atomizing Gas Pressure on Coating Properties in Wire Arc Spraying
Optimizing APS Ceramic Coatings Using Response Surface Methods
An Investigation of the Effects of Droplet Impact Angle in Thermal Spray Deposition
