
Single Contact Electron Beam Induced Current Microscopy for Failure Analysis of Integrated Circuits p. 215

Electrical and Chemical Characterization of FIB-Deposited Insulators p. 223

IC Design Modification Using Laser Assisted Organometal Deposition p. 231

Transmission Electron Microscopy (TEM) Specimen Preparation Technique using Focused Ion Beam (FIB): Application to Material Characterization of Chemical Vapor Deposition of Tungsten (W) and Tungsten Silicides (Wsi[subscript x]) p. 237

Automatic Fault Tracing Using an E-Beam Tester with Reference to a Good Sample p. 243

The Business Aspects of Failure Analysis p. 255

A Process Induced Failure Mechanism in the EEPROM Cell - its Identification and Solution p. 267

Failure Isolation of Mobile Ions Using Secondary Ion Mass Spectroscopy p. 273

Detection of Gate Oxide Defects Using Electrochemical Wet Etching in KOH:H[subscript 2]O Solution p. 279

Spin-On-Glass (SOG) Contamination Causing Single Via Failure p. 287

Use of Failure Analysis Techniques to Optimize the Passivation Process for a TLM 0.35 μm Process p. 293

Effectiveness of Emission Microscopy in the Failure Analysis of CMOS ASIC Devices p. 299

Elimination of Whisker Growth on Tin Plated Electrodes p. 305

Characterization of CMOS Structures (0.6 μm process) Submitted to HBM and CDM ESD Stress Tests p. 315

BiCMOS Die Sort Yield Improvement from Isolation of a Localized Defect Mechanism and Precision TEM Cross Section p. 321

SEM Equipment Capabilities Evaluated for Sub-Half Micron Semiconductor Applications p. 329

Voltage Contrast Application on 1M SRAM Single Bit Failure Analysis p. 339
