Geographic Information Systems for Inventory Management: A Case Study
Network Management Using GIS
GIS-Based Transportation Program Management
Integration of a Municipal Management System with a Geographic Information System

GIS Application for Post Earthquake Investigation
The Use of COGO/GIS in the Route 58 Corridor Development Study: A Case Study
Winter Storm Mapping - GIS-T Application
Using Geographic Information Systems for Highway Maintenance
Using a Geographic Information System to Define Traffic Analysis Zones
Use of Geographic Information Systems for Transportation Data Analysis
Validation and Application of The Model's Trip Table Estimation Process
Estimating Network Model Parameters From Mail Survey Data
Transit Network Modeling - A New Approach
Trip Generation Analysis by Artificial Neural Networks
A Microcomputer Program to Elevate Low Cost Modifications on Urban Freeways
Florida's New Toll Facilities Model
The Impacts of Long Range Policy Options on Investment Needs for New Urban Highway Capacity
Corridor Analysis Using QRS II: Route 9 Case Study
Assignment Modeling with Dynamic Traffic Effects
Forecasting Travel Demand with Dynamic Microsimulation: The Microanalytic Demographic Accounting System (MIDAS)
Impact of Land Use Alternatives on Transportation Demand
A Peak Hour High Capacity Reservation and Person-Based Functional Classification Concept for Urban Mobility Plans and Corridor Growth Management
Calibrating a Citywide Traffic Model
The Development of a Regional GIS/Transportation Database
Better Ways to Update Trip Matrics
Using License Plate Survey Data in Transportation Planning Applications
State-of-the-Art AUTOCAD-Based Program for Simulating Turning Vehicles
Trends in Digital Roadmap Databases for Microcomputer Applications in Transportation

A Graphical Representation of Signal and Stop Sign Control Warrants Combined with Level of Service Estimates
Real-Time Delay Measurement and Intersection Analysis System
A Method for Reviewing and Assessing Passer II and Transyt-7F Signal Timing Optimization Outputs
An Expert System Analysis of SOAP Results
Integrated Use of the 1985 HCM, PASSER, and TRANSYT
Development of a Self-Organizing Traffic Control System Using Neural Network Models
Using Interactive Simulation to Model Individual Driver Behavior under ATIS
A Microcomputer Model to Estimate the Benefits of Volume Generated Auxiliary Passing Lanes on Two Lane Highways
Use of TRAF-NETSIM to Estimate Traffic Impacts of an Urban Resort Area Development

The Wizard of Helpful Intersection Control Hints (WHICH)
Major Enhancements to TRANSYT-7F
The Integration of the Highway Capacity Manual and the TRAF-NETSIM Simulation Model

Collection and Analysis of Permanent Traffic Count Data from Closed Loop Traffic Control Systems
Determining Hours of Congestion for Urban Freeways
Large Truck Safety Decision Support System
A Passer II-90 Postprocessor for Detailed Analysis of Arterial Traffic Control Parameters
An Interactive Input Data Manager for the TRAF System
Tennessee's Integrated Rural Transit Microcomputer Software
Implementation of a Real-Time, Paratransit Scheduling System at DART
Operations Simulation of Rocky Mount to Charlotte Rail Route
Evaluation of Freeway Improvement Alternatives Using CORFLO
A Calibration Process for Automatic Incident Detection Algorithms
User Interfaces for FRESIM Model
The Caltrans/California Polytechnic State University Traffic Operations Center Simulator (TOC)
Analysis of Vessel and Vehicle Queues at Movable Bridges
Simulating the Operation of Buses on Busways
Spreadsheet Pavement Management Systems for Local Roads
A Maintenance Management System for Highways and Urban Streets
A Historical Pavement Management Database Feasibility Study
Estimating Load Impacts on Highway Structures Using the National Bridge Inventory Database
Components of a Total Infrastructure Management System
An Integrated System for Evaluation, Rating, and Management of Bridges
Computer Applications on the Central Artery/Tunnel Project
Automation of Roadway Design at the New Denver International Airport
A Case Study in Computer-Aided Grading Design and Earthwork Computations: Denver International Airport Terminal Access Roadways
A Decision Support System for the Operation of Joint-Use Parking
Application and Comparison of Traffic Operations Software: A Two-way Traffic Feasibility Analysis
A Highway Maintenance Operation Database
The Use of Linked Spreadsheets as a Transportation Problem Solving Tool
General Purpose Microcomputer Software for Transportation Engineering Applications
Software Utilities for Network Traffic Simulation Models
CADD Applications in Transportation: Beyond Highway Design
Transport and Communications Information System with Demonstration Case for Sub Saharan Africa
Validating Mature Expert System Prototypes using the Turing Test
Improving the Graphical Interface in Transportation Planning Software
Methodology for Determining Vehicle Usage and Speeds for Mobile Source Emissions Inventories
Integration of Noise Models and AUTOCAD Capabilities
An Expert System for Stop-Controlled Intersection Design
Tutorial on Computer-Aided Design
