The stormwater management and road tunnel (SMART), Kuala Lumpur, Malaysia - a unique use of tunnel space for both traffic and flood water p. 485

Urban tunnelling experiences on the UK's channel tunnel rail link p. 495

The Kensico - city tunnel for New York City water supply p. 506

Egnatia Odos! : 60 miles of mountainous road tunnels in Northern Greece, Europe p. 516

Lyon-Turin long and deep railway tunnel project p. 531

Sound transit link light rail northern extension p. 546

Design and risk management strategy for the sound transit Beacon Hill Station and tunnels p. 557

Evolving soft-ground tunneling in Seattle p. 568

King County's project delivery approach for the Brightwater project p. 582

Design of the Brightwater conveyance tunnels p. 590

Design and construction of the 42nd Ave S storage and treatment tunnel for the Henderson/ML King CSO project p. 602

Conceptual design for a deep underground science and engineering laboratory - Cascades p. 614

High performance tunnel boring machine for Karahnjukar headrace tunnel, KAR-14 - a design and case history p. 628

The Nancy Creek tunnel : hard rock tunneling in Atlanta p. 642

Baumgartner shafts and tunnel p. 654

The Northwest side relief sewer tunnel - challenges became success stories p. 668

Recent developments in the TBM industry - new and innovative technologies p. 679

Case study in rock mass behavior : TBM versus drill and blast p. 689

Lithologic and structural constraints on TBM tunneling in New York City p. 704

Influence of rock mass properties on performance of hard rock TBMs p. 725

Review of issues related to Cerchar abrasivity testing and their implications on geotechnical investigations and cutter cost estimates p. 738

Construction of the combined sewage overflow tunnel for the city of fall river p. 754

Impacts of geotechnical issues on design of the Beacon Hill Tunnel and Station project p. 767

A new model for characterizing the Cobble and Boulder fraction for soft ground tunneling p. 780

Horizontal geotechnical investigations for tunneling p. 792

Design evaluations for the San Vicente pipeline tunnel p. 804

Geotechnical considerations No. 7 subway line extension project in New York City p. 816

Exploration decision analyses for the Brightwater tunnels p. 832

Means and methods for tunneling through highly squeezing ground : a case history of the Strenger Tunnel, Austria p. 848

Geotechnical design of Devil's Slide tunnel p. 859

The North American tunnel method - lessons learned p. 871

Innovative NATM technology for suburban tunnelling metro section 306, Bochum, Germany p. 882

Design of shallow tunnels for Washington Dulles International Airport people mover p. 902

Collapse and remining of tunnel TO8 at THSRC contract C230 p. 911
Implications of using NATM in underground construction  
p. 921

Grouting and segmental linings - proceed with caution  
p. 930

The design and use of steel fiber reinforced concrete segments  
p. 936

Steel fiber reinforced tunnel linings  
p. 947

Trapezoidal tapered ring - key position selection in curved tunnels  
p. 957

Using steel fibers to reinforce final shotcrete linings  
p. 970

Practical tunnel lining design methodology and guidelines - a series of tunnel design papers  
p. 978

Defining the niche of ground freezing  
p. 996

State-of-art grouting remedy for ground improvement  
p. 1006

Pregrouting in rock : contemporary basic principles  
p. 1015

 Movements due to freezing, thawing and tunneling beneath two buildings  
p. 1027

Additional test results for comparison of penetration of grout made with various ultrafine cement products  
p. 1039

Ground improvements for CSO connections to a large tunnel, Cleveland, Ohio  
p. 1051

Application of ground freezing for underground construction  
p. 1062

Parbati hydroelectric project stage II. India - two inclined pressure shafts with a honeycomb segmental lining driven by a 5m hard rock double shield TBM  
p. 1082

Construction of deep shafts and ground improvement for the West side CSO tunnel project, Portland, Oregon  
p. 1095

Summersville raw water intake  
p. 1104

Design and construction of the Shoal Creek raw water intake at Lake Lanier  
p. 1115

Seismic design measures for the retrofit of the Claremont tunnel  
p. 1128

Design build of tunnel and shaft at Blue Ridge Dam LLO  
p. 1139

Repairs and modifications to the providence water 2.3 m ID scituate aqueduci and tunnel  
p. 1147

Rehabilitation of the Cape Creek highway tunnel under traffic  
p. 1155

Experimental shaft machine for nuclear waste disposal  
p. 1166

New horizons in surveying  
p. 1178

Tunneling data : turning information into intelligence on the NEIS project  
p. 1183

Construction of the Wolf Creek upper narrows tunnel waterproof membrane - a comparison of tunnel projects utilizing the application of spray-on waterproof membrane  
p. 1192

Roadheader tunneling and microtunneling in low strength claystone at Standley Lake, Colorado  
p. 1208

Mixed face tunnel jacking with a grillage  
p. 1218

Adventures in microtunneling  
p. 1228

Portland, Oregon’s other CSO tunnels  
p. 1242

Predicted versus actual obstructions for two pipe-jacked tunnels of the Henderson CSO, Seattle, Washington  
p. 1253

Lake Ft. Smith microtunneling lake tap  
p. 1262

APM tunnels at Phoenix Sky Harbor International Airport  
p. 1272

Queens bored tunnels, east side access, New York  
p. 1282

Port of Miami tunnel study : bored or immersed tubes?  
p. 1289
New York subway caverns and crossovers - a tale of trials and tribulations  p. 1303
Planning and preliminary design of the North-South bypass tunnel, Brisbane, Australia  p. 1315
IH-635 (LBJ freeway) corridor section 4-west traffic tunnels  p. 1334
Tappan Zee crossing of the Hudson River, New York  p. 1345
