Preface
Editors' Biographies
Organizing Committee
Session Chairs
Global Factors Affecting Lead and Zinc
Market Fundamentals and the Evolution of Lead and Zinc Supplies
Lead Product Development in the Next Millennium
Zinc Applications: A World of Performance
Lead and Zinc: A Study of Toxicological Contrasts and Shared Regulatory Concerns
Modern Lead Smelting Technologies I
Primary Lead Production--A Survey of Existing Smelters and Refineries
Operations at the Doe Run Company's Herculaneum Primary Lead Smelter
Modern Lead Smelting at the QSL-Plant Berzelius Metall in Stolberg, Germany
A Review of Ausmelt Technology for Lead Smelting
Cominco's New Lead Smelter at Trail Operations
Commissioning and Optimisation of the New Lead and Silver Refinery at the Pasminco Pirie Smelter
Zinc Operations I
Zinc Production--A Survey of Existing Smelters and Refineries
Use of Data Reconciliation: A Zinc Plant Case Study
Recent Operations at the Hikoshima Smelter
Improvements in the Leaching Circuit of IMMSA's Zinc Plant in San Luis Potosi, Mexico
Expansion Plans at CPM's Electrolytic Zinc Refinery
The Boleslaw Electrolytic Zinc Plant
Modern Lead Smelting Technologies II
Health and Hygiene in the Modern Lead and Zinc Industry
Cominco's Trail Operations: An Integrated Zinc-Lead Operation
The Lead Bath Smelting Process in Nordenham, Germany
QSL Lead Slag Fuming Process Using an Ausmelt Furnace
Recent Developments in the Lead Refining Operations at Britannia Refined Metals Ltd.
Analysis of Dust Formation in the Oxygen Flash Smelting of Lead-Bearing Feeds in the Kivcet Smelter
Zinc Operations II
Recent Operations at the Iijima Zinc Refinery
Improvements at the Electrolytic Zinc Plant of Big River Zinc Corporation, Sauget, Illinois, U.S.A.
Recent Process Improvements in the Kokkola Zinc Roaster
Oxygen Enrichment of Fluo-Solids Roasting at Zincor
Method for Processing Siliceous Zinc Ores
Leaching and Purification at Cominco's Trail Zinc Operations
Imperial Smelting Technologies
The Continuing Evolution of the Imperial Smelting Process

Impurity Distribution in the ISP Process at the Harima Works of Sumitomo Metal Mining Co., Ltd.

Optimization of the New Jersey Refining Process

A Study of the Changes in the Permeability of the Sintering Bed in the Imperial Smelting Process

Changes in the Physical and Mechanical Properties of SiC Trays Caused by Ageing in Zinc Refinery Operations

Development of Mechanization Facilities in the Non-Ferrous Metallurgical Field

Zinc Electrowinning

Review of Engineering and Construction Factors in Building a Zinc Cellhouse

Asturiana de Zinc Expansion at the San Juan de Nieva Plant for a Zinc Production of 440,000 Tonnes per Year

Zinc Autostripping at Falconbridge Limited Kidd Metallurgical Division

Cellhouse Ventilation

New Wrought Pb-Ag-Ca Anodes for Zinc Electrowinning to Produce a Protective Oxide Coating Rapidly

Mechanical Properties and Electrolytic Behavior of Pb-Ag-Ca Ternary Electrodes for Zinc Electrowinning

New Developments in Lead and Zinc

Equilibrium versus Kinetics in Lead Refining

Direct Zinc Smelting in an Iron Oxysulphide Bath

The Influence of New Technology at Sulphide Ore Mine Sites on Metals Production and Recoveries, with its Commercial Significance

Recovery of Zinc and Cadmium from Lead Smelter Furnace Dusts at Met-Mex Penoles by a Solvent Extraction Process

The Kivcet Treatment of Polymetallic Feeds

A Mathematical Model for the Electric Furnace in the Kivcet Process

New Zinc Processing Technologies

Atmospheric Leaching of Zinc Sulphide Concentrates Using Regenerated Ferric Sulphate Solutions

Comparison of Direct Pressure Leaching with Atmospheric Leaching of Zinc Concentrates

Treatment Of Secondary Zinc Oxides For Use In An Electrolytic Zinc Plant

Upcoming Zinc Mine Projects: The Key for Success is Zincex Solvent Extraction

The Galvanic Stripping Treatment of Zinc Residues for Marketable Iron Product Recovery

Separation of Iron from a Zinc Sulphate Electrolyte by Combined Liquid-Liquid Extraction and Electro-Reductive Stripping

New Electrowinning Technologies for Lead and Zinc

New Clean Technologies to Improve Lead-Acid Battery Recycling

Electrowinning of Lead Battery Paste with the Production of Lead and Elemental Sulphur Using Bioprocess Technologies

Performance of a Conventional Cell Design for Zinc Chloride Electrowinning

Spouted Bed Electrowinning of Zinc from Chloride Electrolytes
